PRECAUTIONS

< PRECAUTION >

PRECAUTION

PRECAUTIONS

Precaution for Supplemental Restraint System (SRS) "AIR BAG" and "SEAT BELT PRE-TENSIONER"

INFOID:0000000010481817

The Supplemental Restraint System such as "AIR BAG" and "SEAT BELT PRE-TENSIONER", used along with a front seat belt, helps to reduce the risk or severity of injury to the driver and front passenger for certain types of collision. Information necessary to service the system safely is included in the SR and SB section of this Service Manual.

WARNING:

- To avoid rendering the SRS inoperative, which could increase the risk of personal injury or death in the event of a collision which would result in air bag inflation, all maintenance must be performed by an authorized NISSAN/INFINITI dealer.
- Improper maintenance, including incorrect removal and installation of the SRS, can lead to personal injury caused by unintentional activation of the system. For removal of Spiral Cable and Air Bag Module, see the SR section.
- Do not use electrical test equipment on any circuit related to the SRS unless instructed to in this Service Manual. SRS wiring harnesses can be identified by yellow and/or orange harnesses or harness connectors.

PRECAUTIONS WHEN USING POWER TOOLS (AIR OR ELECTRIC) AND HAMMERS

WARNING:

- When working near the Airbag Diagnosis Sensor Unit or other Airbag System sensors with the Ignition ON or engine running, DO NOT use air or electric power tools or strike near the sensor(s) with a hammer. Heavy vibration could activate the sensor(s) and deploy the air bag(s), possibly causing serious injury.
- When using air or electric power tools or hammers, always switch the Ignition OFF, disconnect the battery and wait at least three minutes before performing any service.

Precaution for Work

INFOID:0000000010481818

- When removing or disassembling each component, be careful not to damage or deform it. If a component may be subject to interference, be sure to protect it with a shop cloth.
- When removing (disengaging) components with a screwdriver or similar tool, be sure to wrap the component with a shop cloth or vinyl tape to protect it.
- Protect the removed parts with a shop cloth and prevent them from being dropped.
- Replace a deformed or damaged clip.
- If a part is specified as a non-reusable part, always replace it with a new one.
- Be sure to tighten bolts and nuts securely to the specified torque.
- After installation is complete, be sure to check that each part works properly.
- Follow the steps below to clean components:
 - Water soluble dirt:
 - Dip a soft cloth into lukewarm water, wring the water out of the cloth and wipe the dirty area.
 - Then rub with a soft, dry cloth.
 - Oily dirt:
 - Dip a soft cloth into lukewarm water with mild detergent (concentration: within 2 to 3%) and wipe the dirty area.
 - Then dip a cloth into fresh water, wring the water out of the cloth and wipe the detergent off.
 - Then rub with a soft, dry cloth.
 - Do not use organic solvent such as thinner, benzene, alcohol or gasoline.
 - For genuine leather seats, use a genuine leather seat cleaner.

SQUEAK AND RATTLE TROUBLE DIAGNOSES

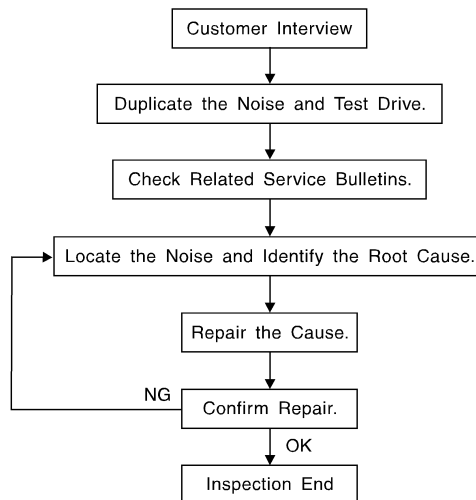

< SYMPTOM DIAGNOSIS >

SYMPTOM DIAGNOSIS

SQUEAK AND RATTLE TROUBLE DIAGNOSES

Work Flow

INFOID:0000000010481824

SBT842

CUSTOMER INTERVIEW

Interview the customer if possible, to determine the conditions that exist when the noise occurs. Use the Diagnostic Worksheet during the interview to document the facts and conditions when the noise occurs and any customer's comments; refer to [SE-26, "Diagnostic Worksheet"](#). This information is necessary to duplicate the conditions that exist when the noise occurs.

- The customer may not be able to provide a detailed description or the location of the noise. Attempt to obtain all the facts and conditions that exist when the noise occurs (or does not occur).
- If there is more than one noise in the vehicle, be sure to diagnose and repair the noise that the customer is concerned about. This can be accomplished by test driving the vehicle with the customer.
- After identifying the type of noise, isolate the noise in terms of its characteristics. The noise characteristics are provided so the customer, service adviser and technician are all speaking the same language when defining the noise.
- Squeak —(Like tennis shoes on a clean floor)
Squeak characteristics include the light contact/fast movement/brought on by road conditions/hard surfaces = higher pitch noise/softer surfaces = lower pitch noises/edge to surface = chirping.
- Creak—(Like walking on an old wooden floor)
Creak characteristics include firm contact/slow movement/twisting with a rotational movement/pitch dependent on materials/often brought on by activity.
- Rattle—(Like shaking a baby rattle)
Rattle characteristics include the fast repeated contact/vibration or similar movement/loose parts/missing clip or fastener/incorrect clearance.
- Knock —(Like a knock on a door)
Knock characteristics include hollow sounding/sometimes repeating/often brought on by driver action.
- Tick—(Like a clock second hand)
Tick characteristics include gentle contacting of light materials/loose components/can be caused by driver action or road conditions.
- Thump—(Heavy, muffled knock noise)
Thump characteristics include softer knock/dead sound often brought on by activity.
- Buzz—(Like a bumble bee)
Buzz characteristics include high frequency rattle/firm contact.
- Often the degree of acceptable noise level will vary depending upon the person. A noise that you may judge as acceptable may be very irritating to the customer.
- Weather conditions, especially humidity and temperature, may have a great effect on noise level.

DUPLICATE THE NOISE AND TEST DRIVE

SQUEAK AND RATTLE TROUBLE DIAGNOSES

< SYMPTOM DIAGNOSIS >

If possible, drive the vehicle with the customer until the noise is duplicated. Note any additional information on the Diagnostic Worksheet regarding the conditions or location of the noise. This information can be used to duplicate the same conditions when you confirm the repair.

If the noise can be duplicated easily during the test drive, to help identify the source of the noise, try to duplicate the noise with the vehicle stopped by doing one or all of the following:

- 1) Close a door.
 - 2) Tap or push/pull around the area where the noise appears to be coming from.
 - 3) Rev the engine.
 - 4) Use a floor jack to recreate vehicle "twist".
 - 5) At idle, apply engine load (electrical load, half-clutch on M/T model, drive position on CVT and A/T models).
 - 6) Raise the vehicle on a hoist and hit a tire with a rubber hammer.
- Drive the vehicle and attempt to duplicate the conditions the customer states exist when the noise occurs.
 - If it is difficult to duplicate the noise, drive the vehicle slowly on an undulating or rough road to stress the vehicle body.

CHECK RELATED SERVICE BULLETINS

After verifying the customer concern or symptom, check ASIST for Technical Service Bulletins (TSBs) related to that concern or symptom.

If a TSB relates to the symptom, follow the procedure to repair the noise.

LOCATE THE NOISE AND IDENTIFY THE ROOT CAUSE

1. Narrow down the noise to a general area. To help pinpoint the source of the noise, use a listening tool (Chassis Ear: J-39570, Engine Ear: J-39565 and mechanic's stethoscope).
2. Narrow down the noise to a more specific area and identify the cause of the noise by:
 - removing the components in the area that you suspect the noise is coming from.
Do not use too much force when removing clips and fasteners, otherwise clips and fasteners can be broken or lost during the repair, resulting in the creation of new noise.
 - tapping or pushing/pulling the component that you suspect is causing the noise.
Do not tap or push/pull the component with excessive force, otherwise the noise will be eliminated only temporarily.
 - feeling for a vibration with your hand by touching the component(s) that you suspect is (are) causing the noise.
 - placing a piece of paper between components that you suspect are causing the noise.
 - looking for loose components and contact marks.Refer to [SE-23, "Generic Squeak and Rattle Troubleshooting"](#).

REPAIR THE CAUSE

- If the cause is a loose component, tighten the component securely.
- If the cause is insufficient clearance between components:
 - separate components by repositioning or loosening and retightening the component, if possible.
 - insulate components with a suitable insulator such as urethane pads, foam blocks, felt cloth tape or urethane tape. A NISSAN Squeak and Rattle Kit (J-50397) is available through your authorized NISSAN Parts Department.

CAUTION:

Do not use excessive force as many components are constructed of plastic and may be damaged.

NOTE:

- Always check with the Parts Department for the latest parts information.
- The materials contained in the NISSAN Squeak and Rattle Kit (J-50397) are listed on the inside cover of the kit; and can each be ordered separately as needed.
- The following materials not found in the kit can also be used to repair squeaks and rattles.
 - SILICONE GREASE: Use instead of UHMW tape that will be visible or does not fit. The silicone grease will only last a few months.
 - SILICONE SPRAY: Use when grease cannot be applied.
 - DUCT TAPE: Use to eliminate movement.

CONFIRM THE REPAIR

Confirm that the cause of a noise is repaired by test driving the vehicle. Operate the vehicle under the same conditions as when the noise originally occurred. Refer to the notes on the Diagnostic Worksheet.

Generic Squeak and Rattle Troubleshooting

INFOID:0000000010481825

Refer to Table of Contents for specific component removal and installation information.

SQUEAK AND RATTLE TROUBLE DIAGNOSES

< SYMPTOM DIAGNOSIS >

INSTRUMENT PANEL

Most incidents are caused by contact and movement between:

1. Cluster lid A and the instrument panel
2. Acrylic lens and combination meter housing
3. Instrument panel to front pillar finisher
4. Instrument panel to windshield
5. Instrument panel pins
6. Wiring harnesses behind the combination meter
7. A/C defroster duct and duct joint

These incidents can usually be located by tapping or moving the components to duplicate the noise or by pressing on the components while driving to stop the noise. Most of these incidents can be repaired by applying felt cloth tape or silicone spray (in hard to reach areas). Urethane pads can be used to insulate wiring harness.

CAUTION:

Do not use silicone spray to isolate a squeak or rattle. If you saturate the area with silicone, you will not be able to recheck the repair.

CENTER CONSOLE

Components to pay attention to include:

1. Shift selector assembly cover to finisher
2. A/C control unit and cluster lid C
3. Wiring harnesses behind audio and A/C control unit

The instrument panel repair and isolation procedures also apply to the center console.

DOORS

Pay attention to the:

1. Finisher and inner panel making a slapping noise
2. Inside handle escutcheon to door finisher
3. Wiring harnesses tapping
4. Door striker out of alignment causing a popping noise on starts and stops

Tapping or moving the components or pressing on them while driving to duplicate the conditions can isolate many of these incidents. You can usually insulate the areas with felt cloth tape or insulator foam blocks from the NISSAN Squeak and Rattle Kit (J-50397) to repair the noise.

TRUNK

Trunk noises are often caused by a loose jack or loose items put into the trunk by the owner.

In addition look for:

1. Trunk lid bumpers out of adjustment
2. Trunk lid striker out of adjustment
3. The trunk lid torsion bars knocking together
4. A loose license plate or bracket

Most of these incidents can be repaired by adjusting, securing or insulating the item(s) or component(s) causing the noise.

SUNROOF/HEADLINING

Noises in the sunroof/headlining area can often be traced to one of the following:

1. Sunroof lid, rail, linkage or seals making a rattle or light knocking noise
2. Sun visor shaft shaking in the holder
3. Front or rear windshield touching headlining and squeaking

Again, pressing on the components to stop the noise while duplicating the conditions can isolate most of these incidents. Repairs usually consist of insulating with felt cloth tape.

OVERHEAD CONSOLE (FRONT AND REAR)

Overhead console noises are often caused by the console panel clips not being engaged correctly. Most of these incidents are repaired by pushing up on the console at the clip locations until the clips engage.

In addition look for:

SQUEAK AND RATTLE TROUBLE DIAGNOSES

< SYMPTOM DIAGNOSIS >

1. Loose harness or harness connectors.
2. Front console map/reading lamp lens loose.
3. Loose screws at console attachment points.

A

SEATS

When isolating seat noise it's important to note the position the seat is in and the load placed on the seat when the noise is present. These conditions should be duplicated when verifying and isolating the cause of the noise.

B

Cause of seat noise include:

C

1. Headrest rods and holder
2. A squeak between the seat pad cushion and frame
3. The rear seatback lock and bracket

D

These noises can be isolated by moving or pressing on the suspected components while duplicating the conditions under which the noise occurs. Most of these incidents can be repaired by repositioning the component or applying urethane tape to the contact area.

E

UNDERHOOD

Some interior noise may be caused by components under the hood or on the engine wall. The noise is then transmitted into the passenger compartment.

F

Causes of transmitted underhood noise include:

1. Any component installed to the engine wall
2. Components that pass through the engine wall
3. Engine wall mounts and connectors
4. Loose radiator installation pins
5. Hood bumpers out of adjustment
6. Hood striker out of adjustment

G

H

These noises can be difficult to isolate since they cannot be reached from the interior of the vehicle. The best method is to secure, move or insulate one component at a time and test drive the vehicle. Also, engine rpm or load can be changed to isolate the noise. Repairs can usually be made by moving, adjusting, securing, or insulating the component causing the noise.

SQUEAK AND RATTLE TROUBLE DIAGNOSES

< SYMPTOM DIAGNOSIS >

Diagnostic Worksheet

INFOID:000000010481826

Dear Customer:

We are concerned about your satisfaction with your vehicle. Repairing a squeak or rattle sometimes can be very difficult. To help us fix your vehicle right the first time, please take a moment to note the area of the vehicle where the squeak or rattle occurs and under what conditions. You may be asked to take a test drive with a service advisor or technician to ensure we confirm the noise you are hearing.

SQUEAK & RATTLE DIAGNOSTIC WORKSHEET

I. WHERE DOES THE NOISE COME FROM? (circle the area of the vehicle)

The illustrations are for reference only, and may not reflect the actual configuration of your vehicle.

Continue to page 2 of the worksheet and briefly describe the location of the noise or rattle. In addition, please indicate the conditions which are present when the noise occurs.

SQUEAK AND RATTLE TROUBLE DIAGNOSES

< SYMPTOM DIAGNOSIS >

SQUEAK & RATTLE DIAGNOSTIC WORKSHEET - page 2

Briefly describe the location where the noise occurs:

II. WHEN DOES IT OCCUR? (please check the boxes that apply)

- | | |
|---|--|
| <input type="checkbox"/> Anytime | <input type="checkbox"/> After sitting out in the rain |
| <input type="checkbox"/> 1st time in the morning | <input type="checkbox"/> When it is raining or wet |
| <input type="checkbox"/> Only when it is cold outside | <input type="checkbox"/> Dry or dusty conditions |
| <input type="checkbox"/> Only when it is hot outside | <input type="checkbox"/> Other: |

III. WHEN DRIVING:

- ☐ Through driveways
- ☐ Over rough roads
- ☐ Over speed bumps
- ☐ Only about ____ mph
- ☐ On acceleration
- ☐ Coming to a stop
- ☐ On turns: left, right or either (circle)
- ☐ With passengers or cargo
- ☐ Other: _____
- ☐ After driving ____ miles or ____ minutes

IV. WHAT TYPE OF NOISE

- ☐ Squeak (like tennis shoes on a clean floor)
- ☐ Creak (like walking on an old wooden floor)
- ☐ Rattle (like shaking a baby rattle)
- ☐ Knock (like a knock at the door)
- ☐ Tick (like a clock second hand)
- ☐ Thump (heavy muffled knock noise)
- ☐ Buzz (like a bumble bee)

TO BE COMPLETED BY DEALERSHIP PERSONNEL

DRIVER SIDE : Removal and Installation - Seat Assembly

INFOID:0000000010481828

REMOVAL

WARNING:

Do not leave any objects (screwdrivers, tools, etc.) on the seat during seat repair. It can lead to personal injury if the side air bag module should accidentally deploy.

CAUTION:

- When removing or installing the seat trim, handle it carefully to keep dirt out and to avoid damage.
- When checking the power seat circuit for continuity using a circuit tester, do not confuse its connector with the side air bag module connector. Such an error may cause the air bag module to deploy.
- Do not drop, tilt, or bump the side air bag module while installing the seat. Always handle it with care.
- After front side air bag module inflates, the front seatback must be replaced.
- When removing and installing the seat, use shop cloths to protect components from damage.
- Before removing the front seat, turn the ignition switch OFF, disconnect both battery cables and wait at least three minutes.

1. Remove the headrest.
2. Raise seat to the highest position.
3. Slide the seat to the full rearward position.
4. Disconnect battery negative and positive terminals and wait at least three minutes. Refer to [PG-78. "Removal and Installation"](#) (power seat only).
5. Remove the front slide covers (LH/RH) (A) by releasing four

⊖: Pawl

6. Connect battery negative and positive terminals and wait at least three minutes. Refer to [PG-78. "Removal and Installation"](#) (power seat only).
7. Remove the two front seat bolts.
8. Slide the seat to the full forward position.
9. Disconnect battery negative and positive terminals and wait at least three minutes. Refer to [PG-78. "Removal and Installation"](#) (power seat only).
10. Remove the two rear seat bolts.
11. Tilt the seat rearward to disconnect the harness connectors from the seat and remove.

INSTALLATION

Installation is in the reverse order of removal.

CAUTION:

Make sure that the seat harness or the floor trim is not damaged during installation.

FRONT SEAT

< REMOVAL AND INSTALLATION >

- When installing the LH front seat, tighten the bolts in the order shown.

LH front seat bolt torque : 49 N·m (5.0 kg-m, 36 lb-ft)

DRIVER SIDE : Removal and Installation - Seatback Board

INFOID:000000010481829

REMOVAL

CAUTION:

Always work from the side or back of the seatback, do not work in front of seat.

- Remove the seatback board (1).

NOTE:

The back side of the seatback board is shown to assist with identifying fastener location.

- Release the two bottom clips (A) using a suitable tool.

△: Clip

- Insert fingers into sides (←) and pull out the seatback board, while pressing the side clips (B) to release it from the seatback frame.
- Pull the seatback board down releasing the upper hooks (C) and remove.

INSTALLATION

Installation is in the reverse order of removal.

REMOVAL

NOTE:

Rear seatback assembly (RH) must be removed first, then rear seatback assembly (LH) can be removed.

1. Remove the rear seat cushion assembly. Refer to [SE-42, "Removal and Installation - Seat Cushion Assembly"](#).
2. Remove the rear seat bolster (RH). Refer to [SE-44, "Removal and Installation - Rear Seat Bolster"](#).
3. Remove the rear seatback assembly (RH) (1).
 - a. Remove the seatback pivot bolt (A).

CAUTION:
Do not remove hinge bolt (B) or seatback alignment may be necessary.
 - b. Release the seatback latch assembly then remove the rear seatback assembly (1) from the seatback hinge (RH) (2).
 - c. Remove the rear seatback assembly (RH).

ALJIA0938ZZ

4. Remove the rear seat bolster (LH). Refer to [SE-44, "Removal and Installation - Rear Seat Bolster"](#).
5. Remove the rear seatback assembly (LH) (1).
 - a. Remove retaining clip (A) from seatback pivot pin (B) using a suitable tool.

NOTE:

Retaining clip (A) is used for factory installation only, it is not a serviceable part and not necessary to use during installation.

ALJIA0939ZZ

REAR SEAT

< REMOVAL AND INSTALLATION >

- b. Remove the seatback pivot bolt (A).
CAUTION:
Do not remove hinge bolt (B) or seatback alignment may be necessary.
- c. Release the seatback latch assembly then remove the rear seatback assembly (1) from the seatback hinge (LH) (2).
- d. Remove the rear seatback assembly (LH).

INSTALLATION

Installation is in the reverse order of removal.

- Tighten bolts and nuts to specification. Refer to [SE-39, "Exploded View"](#).

Removal and Installation - Seatback Hinge

INFOID:0000000010481838

REMOVAL

1. Remove the seat cushion assembly, rear seatback assembly (RH), and the rear seatback assembly (LH). Refer to [SE-42, "Removal and Installation - Seat Assembly"](#).
2. Remove the bolt and nut from the seatback hinge assembly (RH), then remove.
3. Remove the bolt from the seatback hinge (LH), then remove.

INSTALLATION

1. Install seatback hinge assembly (RH) and seatback hinge (LH) loosely.
2. Install the rear seatback assembly (LH) and engage into seatback latch assembly.
3. Install the rear seatback assembly (RH) and engage into seatback latch assembly.
4. Tighten seatback hinge nut and bolts to specification. Refer to [SE-39, "Exploded View"](#).

CAUTION:

Ensure rear seatback assemblies (LH/RH) fold and latch properly. Adjust if necessary.

5. Install remaining components in reverse order of removal.

Removal and Installation - Seatback Latch Assembly

INFOID:0000000010481839

REMOVAL

1. Remove the rear seat bolster (LH/RH). Refer to [SE-44, "Removal and Installation - Rear Seat Bolster"](#).
2. Place the rear seatback assemblies (LH/RH) in the folded down position.
3. Remove the rear parcel shelf finisher. Refer to [INT-26, "Exploded View"](#).
4. From trunk area release pawls (A) to open cable guide (1).
5. Unclip latch cable (2) at location (B).

⇐: Front

NOTE:

LH side shown; RH side similar.

6. Remove two seatback latch assembly bolts and the seatback latch assembly.

INSTALLATION

Installation is in the reverse order of removal.

- Tighten two seatback latch assembly bolts to specification. Refer to [SE-39, "Exploded View"](#).

REAR SEAT

DRIVER SIDE : Disassembly and Assembly

INFOID:0000000010481843

SEATBACK ASSEMBLY

WARNING:

Do not leave any objects (screwdrivers, tools, etc.) on the seat during seatback repair. It can lead to personal injury if the side air bag should accidentally deploy.

CAUTION:

- Before servicing, turn ignition switch OFF, disconnect both battery terminals and wait at least three minutes.
- Handle the side air bag module carefully. During disassembly, always hold the side air bag module, do not let it hang by the wire harness.
- Always work from the side or back of the seatback, do not work in front of seat.
- Do not use air tools or electric tools for servicing the seat.
- Replace the side air bag module if it has been dropped or sustained an impact.
- Do not insert any objects into the side air bag module.
- Do not attempt to disassemble the side air bag module.
- Do not expose the side air bag module to temperatures exceeding 93°C (200°F).
- Do not expose the side air bag module to any oil, grease, detergent or water.
- During disassembly, do not damage the seatback board, chutes, connectors, retainers, clips, module harness or the side air bag module.
- During disassembly do not damage the seatback pad or seatback heater.

NOTE:

If the vehicle has been involved in a collision and the side air bag has deployed, the front seatback assembly must be replaced.

Disassembly

1. Remove the front driver seat. Refer to [SE-31, "DRIVER SIDE : Removal and Installation - Seat Assembly"](#).
2. Remove the seatback board. Refer to [SE-32, "DRIVER SIDE : Removal and Installation - Seatback Board"](#).

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

3. Release the J-clips (A) holding the seatback trim to the seatback frame.
4. Remove the rear hinge cover (1).
5. Disconnect the harness connector (B) from the lumbar support assembly (if equipped).
6. Disconnect the harness connector (C) from the reclining motor.
7. Unclip the harness at locations (E) (if equipped).

NOTE:

Take note of harness routing and attachment location for accurate installation.

8. Unclip the side air bag module harness at locations (D).

9. From the bottom of the seat.

- a. Unclip the side air bag module harness (1) at locations (A).

NOTE:

Take note of harness routing and attachment location for accurate installation.

- b. Disconnect harness connector (B) from the seatback heater (if equipped).

10. Remove the seat cushion outer finisher (LH) (1).

- a. For power seat:

- i. Remove screw (A).

- ii. Release metal clips (B) from the seat cushion frame (2), as shown.

[]: Metal clip

- iii. Release pawls to separate.

() : Pawl

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

- iv. Disconnect the harness connector (A) from the power seat switch (1).
- v. Remove screws (B) if necessary to replace the power seat switch (1).
- vi. Disconnect the harness connector (D) from the lumbar support switch (2) (if equipped).
- vii. Release pawls (C) if necessary to replace the lumbar support switch (2) (if equipped).

- b. For manual seat:
 - i. Release pawl and remove recline lever (3) as shown.
 - ii. Remove two screws (B) and remove the lift lever (2).
 - iii. Release metal clips (A) from the seat cushion frame (4) as shown.
- iv. Release the remaining pawls then remove the seat cushion outer finisher (LH) (1).

[]: Metal clip

○: Pawl

11. Remove the seat cushion outer finisher (RH) (1).
- a. Release pawls then pull to release the metal clip.

[]: Metal clip

○: Pawl

12. Remove the seat cushion inner finisher front (LH/RH) and seat cushion inner finisher rear (LH/RH).

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

13. Remove bolts (A) on both sides of seatback frame (1) and remove the seatback assembly (1).

14. Remove the seatback pad from the seatback frame.
a. Release the headrest holder locks as shown and remove the headrest holders.

CAUTION:

Before removing/installing the headrest holder, check its orientation (front/rear and right/left).

- b. Remove and discard the side air bag module nuts (A).

CAUTION:

Do not reuse the side air bag module nuts.

(1): Side air bag module

- c. Disengage the side air bag module studs from the seatback frame and lift the seatback trim and seatback pad as an assembly to remove from the seatback frame.

15. Separate the seatback trim from the seatback pad (if necessary).

- a. Open the seatback trim and release the side air bag module studs (A) protruding through holes in the chute (B).
b. Pull the side air bag module (1) out of the chute (B) and remove from the seatback trim.

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

- c. Pull the seatback trim (1) upward from bottom to release hook fasteners (A).
- d. Remove three hog rings and separate the seatback trim from the seatback pad.

[]: Hog ring

NOTE:

Remove all pieces of hog rings and discard them.

- 16. Remove the seatback heater from seatback pad (if necessary). Refer to [SE-60, "DRIVER SIDE : Front Seat Heater"](#).

Assembly

Assembly is in the reverse order of disassembly.

CAUTION:

- Inspect seatback pad, seatback trim and seatback trim chutes. Replace if damaged.
- Smooth out all wrinkles during assembly.
- Always route side air bag module harness in original location. Replace any deformed or damaged clips with same type and color. Always install clips in the original location in the harness.
- After work is completed, check that no system malfunction is detected causing the air bag warning lamp to illuminate.
- If a malfunction is detected by the air bag warning lamp after repair or replacement of the malfunction parts, perform the SRS final check. Refer to [SRC-17, "SRS Final Check"](#).
- When installing the side air bag module, make sure the side air bag chute (2) is pulled over the outboard surface of the side air bag module (3). Make sure there are no wrinkles and the chute is not folded, twisted or pinched.

(1) Seatback pad

(4) Frame

(5) Seatback board

⇐: Front

CAUTION:

- Do not reuse side air bag module nuts.
- Make sure the side air bag module nuts are tightened to specification. Refer to [SE-45, "DRIVER SIDE : Exploded View"](#).

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

- When installing the seatback trim, firmly push down while sliding your hand along the seams as shown (➡) to ensure the hook fasteners below the seatback trim are fastened properly.

- Install new hog rings on the seatback trim in original positions. Use only one hog ring in each designated location. Ensure hog rings are correctly fastened around both the seatback trim and seatback pad wires. Use NISSAN standard hog rings and tools to assemble.

- Install all seatback frame bolts and tighten evenly in sequence shown. Tighten the seatback frame bolts to specification. Refer to [SE-45, "DRIVER SIDE : Exploded View"](#).

SEAT CUSHION

WARNING:

Do not leave any objects (screwdrivers, tools, etc.) on the seat during seat cushion repair. It can lead to personal injury if the side air bag should accidentally deploy.

CAUTION:

- Before servicing, turn ignition switch OFF, disconnect both battery terminals and wait at least three minutes.
- Always work from the side or back of the seatback, do not work in front of seat.
- Do not use air tools or electric tools for servicing the seat.
- During disassembly, do not damage the seatback cover, chutes, connectors, retainers, clips, module harness or the side air bag module.
- During disassembly do not damage the seat cushion pad or seat cushion heater.

Disassembly

- Remove the front driver seat. Refer to [SE-31, "DRIVER SIDE : Removal and Installation - Seat Assembly"](#).

NOTE:

Raise the front driver seat to highest position before removing.

- Remove the seatback board. Refer to [SE-32, "DRIVER SIDE : Removal and Installation - Seatback Board"](#).
- Remove the rear hinge cover.

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

4. From the bottom of the seat, disconnect the harness connector (C) from the seat cushion heater (if equipped).
 (A) Side air bag module harness clips.
 (B) Harness connector for the seatback heater (if equipped)

NOTE:

Take note of harness routing and attachment location for accurate installation.

5. Remove the seat cushion outer finisher (LH) (1).
 - a. For power seat:
 - i. Remove screw (A).
 - ii. Release metal clips (B) from the seat cushion frame (2), as shown.

□: Metal clip
 - iii. Release pawls to separate.

○: Pawl

- iv. Disconnect the harness connector (A) from the power seat switch (1).
- v. Remove screws (B) if necessary to replace the power seat switch (1).
- vi. Disconnect the harness connector (D) from the lumbar support switch (2) (if equipped).
- vii. Release pawls (C) if necessary to replace the lumbar support switch (if equipped).

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

- b. For manual seat:
 - i. Release pawl and remove recline lever (3) as shown.
 - ii. Remove two screws (B) and remove the lift lever (2).
 - iii. Release metal clips (A) from the seat cushion frame (4), as shown.
- []: Metal clip
- iv. Release the remaining pawls then remove the seat cushion outer finisher (LH) (1).
- (○): Pawl

- 6. Remove the seat cushion outer finisher (RH) (1).
- a. Release pawls then pull to release the metal clip.
- []: Metal clip
 - (○): Pawl

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

7. Remove the seat cushion trim (1) and seat cushion pad as an assembly.

⇐:Front

- a. Release J-clips (A) holding the seat cushion trim to the seat cushion frame.
- b. Release J-clip (B) holding the seat cushion trim to the seat cushion frame.
- c. Release J-clips (D) holding the seat cushion trim to the seat cushion frame.
- d. Release retainer strips (C) holding the seat cushion trim to the seat cushion frame.
- e. Disconnect the harness connector from the seat cushion heater (if equipped).

NOTE:

Take note of harness routing and attachment location for accurate installation.

8. Remove the seat cushion trim (1) and the seat cushion pad from the seat cushion frame.

9. Separate the seat cushion trim (1) from the seat cushion pad.

- a. Pull the seat cushion trim upward to release hook fasteners (A).
- b. Remove three hog rings and separate the seat cushion trim from the seat cushion pad.

[]: Hog ring

NOTE:

Remove all pieces of hog rings and discard them.

10. Remove seat cushion heater from seat cushion pad (if necessary). Refer to [SE-60, "DRIVER SIDE : Front Seat Heater"](#).

Assembly

Assembly is in the reverse order of disassembly.

CAUTION:

- Smooth out all wrinkles during assembly.
- Always route side air bag module harness in original location. Replace any deformed or damaged clips with same type and color. Always install clips in the original location in the harness.
- After work is completed, check that no system malfunction is detected causing the air bag warning lamp to illuminate.
- If a malfunction is detected by the air bag warning lamp after repair or replacement of the malfunction parts, perform the SRS final check. Refer to [SRC-17, "SRS Final Check"](#).

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

- When installing the seat cushion trim, firmly push down while sliding your hand along the seams as shown (←) to ensure the hook fasteners below the seat cushion trim are fastened properly.

- Install new hog rings on the seat cushion trim in original positions. Use only one hog ring in each designated location. Ensure hog rings are correctly fastened around both the seat cushion trim and seat cushion pad wires. Use NISSAN standard hog rings and tools to assemble.

INFOID:000000010481844

DRIVER SIDE : Side air bag module

WARNING:

Do not leave any objects (screwdrivers, tools, etc.) on the seat during seatback repair. It can lead to personal injury if the side air bag should accidentally deploy.

CAUTION:

- Before servicing, turn ignition switch OFF, disconnect both battery terminals and wait at least three minutes.
- Handle the side air bag module carefully. During disassembly, always hold the side air bag module, do not let it hang by the wire harness.
- Always work from the side or back of the seatback assembly, do not work in front of seat.
- Do not use air tools or electric tools for servicing the seat.
- Replace the side air bag module if it has been dropped or sustained an impact.
- Do not insert any objects into the side air bag module.
- Do not attempt to disassemble the side air bag module.
- Do not expose the side air bag module to temperatures exceeding 93°C (200°F).
- Do not expose the side air bag module to any oil, grease, detergent or water.
- During disassembly, do not damage the seatback board, chutes, connectors, retainers, clips, module harness or the side air bag module.

NOTE:

- If the vehicle has been involved in a collision and the side air bag has deployed, the front seatback assembly must be replaced.
- For side air bag module removal and installation, seatback trim and seatback pad must be removed.

REMOVAL

- Remove the front driver seat. Refer to [SE-31. "DRIVER SIDE : Removal and Installation - Seat Assembly"](#).
- Remove the seatback board. Refer to [SE-32. "DRIVER SIDE : Removal and Installation - Seatback Board"](#).

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

3. Release the J-clips (A) holding the seatback trim (1) to the seat-back frame.
4. Remove the rear hinge cover (1).
5. Unclip the side air bag module harness at locations (D).
 (B) Harness connector for the lumbar support assembly (if equipped)
 (C) Harness connector for the reclining motor (if equipped)
 (E) Harness clips (if equipped)

NOTE:

Take note of harness routing and attachment location for accurate installation.

6. From the bottom of the seat.
 - a. Unclip the side air bag module harness (1) at locations (A).
NOTE:
 Take note of harness routing and attachment location for accurate installation.
 - b. Disconnect the harness connector (B) from the seatback heater (if equipped).

7. Release the headrest holder locks as shown and remove the headrest holders.
CAUTION:
 Before removing/installing the headrest holder, check its orientation (front/rear and right/left).

8. Remove and discard the two side air bag module nuts (A).
 (1) Side air bag module
CAUTION:
 Do not reuse the side air bag module nuts.

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

9. Disengage the side air bag module studs from the seatback frame and lift the seatback cushion trim and seatback pad as an assembly to remove from the seatback frame.
10. Open the seatback cushion and release the side air bag module studs (A) protruding through holes in the chute (B).
11. Pull the side air bag module (1) out of the chute (B) and remove from the seatback trim.

CAUTION:

- Replace the front passenger air bag module if it has been dropped or sustained an impact.
- Do not strike the front passenger air bag module.

INSTALLATION

Installation is in the reverse order of removal.

CAUTION:

- Inspect seatback pad, seatback trim and seatback trim chutes. Replace if damaged.
- Smooth out all wrinkles during assembly.
- Always route side air bag module harness in original location. Replace any deformed or damaged clips with same type and color. Always install clips in the original location in the harness.
- After installation is completed, check that no system malfunction is detected causing the air bag warning lamp to illuminate.
- If a malfunction is detected by the air bag warning lamp after repair or replacement of the malfunction parts, perform the SRS final check. Refer to [SRC-17. "SRS Final Check"](#).

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

- When installing the side air bag module, make sure the side air bag chute (2) is pulled over the outboard surface of the side air bag module (3). Make sure there are no wrinkles and the chute is not folded, twisted or pinched.

- (1) Seatback pad
- (4) Frame
- (5) Seatback board

⇐: Front

- Tighten the side air bag nuts to specification. Refer to [SE-45, "DRIVER SIDE : Exploded View"](#).

CAUTION:

- Do not reuse side air bag module nuts.

DRIVER SIDE : Front Seat Heater

INFOID:0000000011198908

REMOVAL

Seat Heater - Seatback pad

- Remove seatback pad. Refer to [SE-48, "DRIVER SIDE : Disassembly and Assembly"](#).
- Carefully remove front seatback heater from seatback pad.

CAUTION:

- Carefully remove seatback heater from seatback pad.
- Do not damage seatback pad when removing seatback heater, if damaged replace seatback pad

INSTALLATION

Seatback pad

- Peel protective backing from front seatback heater and attach to seatback pad.
- Secure the front seatback heater harness to the seatback frame.
- Install the remaining seatback components. Refer to [SE-48, "DRIVER SIDE : Disassembly and Assembly"](#).

REMOVAL

Seat Heater - Seat cushion pad

- Remove seat cushion pad. Refer to [SE-48, "DRIVER SIDE : Disassembly and Assembly"](#).
- Carefully remove front seat cushion heater from seat cushion pad.

CAUTION:

- Carefully remove seat cushion heater from seat cushion pad.
- Do not damage seat cushion pad when removing seat cushion heater, if damaged replace seat cushion pad

INSTALLATION

Seat cushion pad

- Peel protective backing from front seat cushion heater and attach to seat cushion pad.
- Secure the front seat cushion heater harness to the seat cushion frame.
- Install the remaining seat cushion components. Refer to [SE-48, "DRIVER SIDE : Disassembly and Assembly"](#).

SEATBACK ASSEMBLY

WARNING:

Do not leave any objects (screwdrivers, tools, etc.) on the seat during seatback repair. It can lead to personal injury if the side air bag should accidentally deploy.

CAUTION:

- Before servicing, turn ignition switch OFF, disconnect both battery terminals and wait at least three minutes.
- Handle the side air bag module carefully. During disassembly, always hold the side air bag module, do not let it hang by the wire harness.
- Always work from the side or back of the seatback, do not work in front of seat.
- Do not use air tools or electric tools for servicing the seat.
- Replace the side air bag module if it has been dropped or sustained an impact.
- Do not insert any objects into the side air bag module.
- Do not attempt to disassemble the side air bag module.
- Do not expose the side air bag module to temperatures exceeding 93°C (200°F).
- Do not expose the side air bag module to any oil, grease, detergent or water.
- During disassembly, do not damage the seatback board, chutes, connectors, retainers, clips, module harness or the side air bag module.
- During disassembly do not damage the seatback pad or seatback heater.

NOTE:

If the vehicle has been involved in a collision and the side air bag has deployed, the front seatback assembly must be replaced.

Disassembly

1. Remove the front passenger seat. Refer to [SE-36. "PASSENGER SIDE : Removal and Installation - Seat Assembly"](#).
2. Remove the seatback board. Refer to [SE-37. "PASSENGER SIDE : Removal and Installation - Seatback Board"](#).

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

3. Release the J-clips (A) holding the seatback trim to the seatback frame.
4. Remove the rear hinge cover (1).
5. Unclip the side air bag module harness at locations (B).

NOTE:

Take note of harness routing and attachment location for accurate installation.

6. From the bottom of the seat.
 - a. Unclip the side air bag module harness (1) at locations (A).
NOTE:
 Take note of harness routing and attachment location for accurate installation.
 - b. Disconnect harness connectors (B) from the seatback heater (if equipped).
 (C) Harness connector for the seat cushion heater

7. Remove the seat cushion outer finisher (RH) (1).
 - a. For power seat:
 - i. Release metal clips (A) from the seat cushion frame (3) as shown (←).
 - ii. Release pawls to separate.
 - iii. Disconnect the harness connector from the power seat switch (2) and if necessary remove screws and power seat switch.

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

- b. For manual seat:
 - i. Remove the seat cushion outer finisher (RH) (2).
 - ii. Release pawl and remove recline lever (1) as shown.
 - iii. Release metal clips (A) from the seat cushion frame (3) as shown (←).
 - []: Metal clip
 - iv. Release the remaining pawls then remove the seat cushion outer finisher (RH) (2).
 - : Pawl

- 8. Remove the seat cushion outer finisher (LH) (1).
- a. Release pawls then pull to release the metal clip.
- []: Metal clip
- : Pawl

- 9. Remove the seat cushion inner finisher front (LH/RH) and seat cushion inner finisher rear (LH/RH).
- 10. Remove bolts (A) on both sides of seatback assembly (1) and remove the seatback assembly (1).

- 11. Remove the seatback pad from the seatback frame.

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

- a. Release the headrest holder locks as shown and remove the headrest holders.

CAUTION:

Before removing/installing the headrest holder, check its orientation (front/rear and right/left).

- b. Remove and discard the side air bag module nuts (A).
(1) Side air bag module

CAUTION:

Do not reuse the side air bag module nuts.

- c. Disengage the side air bag module studs from the seatback frame and lift the seatback trim and seatback pad as an assembly to remove from the seatback frame.

12. Separate the seatback trim from the seatback pad (if necessary).

- a. Open the seatback trim and release the side air bag module studs (A) protruding through holes in the chute (B).
- b. Pull the side air bag module (1) out of the chute (B) and remove from the seatback trim.

- c. Pull the seatback trim (1) upward from bottom to release hook fasteners (A).
- d. Remove three hog rings and separate the seatback trim from the seatback pad.

[]: Hog ring

NOTE:

Remove all pieces of hog rings and discard them.

13. Remove the seatback heater from seatback pad (if necessary). Refer to [SE-76. "PASSENGER SIDE : Front Seat Heater"](#).

Assembly

Assembly is in the reverse order of disassembly.

CAUTION:

- Inspect seatback pad, seatback trim and seatback trim chutes. Replace if damaged.
- Smooth out all wrinkles during assembly.

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

- Always route side air bag module harness in original location. Replace any deformed or damaged clips with same type and color. Always install clips in the original location in the harness.
- After work is completed, check that no system malfunction is detected causing the air bag warning lamp to illuminate.
- If a malfunction is detected by the air bag warning lamp after repair or replacement of the malfunction parts, perform the SRS final check. Refer to [SRC-17, "SRS Final Check"](#).
- When installing the side air bag module, make sure the side air bag chute (4) is pulled over the outboard surface of the side air bag module (3). Make sure there are no wrinkles and the chute is not folded, twisted or pinched.

- (1) Seatback pad
- (2) Frame
- (5) Seatback board

⇐: Front

CAUTION:

- Do not reuse side air bag module nuts.
- Make sure the side air bag module nuts are tightened to specification. Refer to [SE-61, "PASSENGER SIDE : Exploded View"](#).

- When installing the seatback trim, firmly push down while sliding your hand along the seams as shown (⇐) to ensure the hook fasteners below the seatback trim are fastened properly.

- Install new hog rings on the seatback trim in original positions. Use only one hog ring in each designated location. Ensure hog rings are correctly fastened around both the seatback trim and seatback pad wires. Use NISSAN standard hog rings and tools to assemble.

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

- Install all seatback frame bolts and tighten evenly in sequence shown.
Tighten the seatback frame bolts to specification. Refer to [SE-61, "PASSENGER SIDE : Exploded View"](#).

SEAT CUSHION

WARNING:

Do not leave any objects (screwdrivers, tools, etc.) on the seat during seat cushion repair. It can lead to personal injury if the side air bag should accidentally deploy.

CAUTION:

- Before servicing, turn ignition switch OFF, disconnect both battery terminals and wait at least three minutes.
- Always work from the side or back of the seatback assembly, do not work in front of seat.
- Do not use air tools or electric tools for servicing the seat assembly.
- During disassembly, do not damage the seatback cover, chutes, connectors, retainers, clips, module harness or the side air bag module.
- During disassembly do not damage the seat cushion pad or seat cushion heater.

Disassembly

1. Remove the front passenger seat. Refer to [SE-36, "PASSENGER SIDE : Removal and Installation - Seat Assembly"](#).
2. Disconnect the harness connector from the occupant classification system control unit.
3. Remove occupant classification system control unit screws.
4. Remove occupant classification system control unit.

CAUTION:

- Replace the occupant classification control unit if it has been dropped or sustained an impact.
- Do not strike the occupant classification control unit.

5. Remove the seatback board. Refer to [SE-37, "PASSENGER SIDE : Removal and Installation - Seatback Board"](#).
6. Remove the rear hinge cover.
7. From the bottom of the seat disconnect the harness connector (C) from the seat cushion heater (if equipped).
(A) Side air bag harness clips
(B) Harness connector for the seatback heater

NOTE:

Take note of harness routing and attachment location for accurate installation.

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

8. Remove the seat cushion outer finisher (RH) (1).
 - a. For power seat:
 - i. Release metal clips (A) from the seat cushion frame (3) as shown (←).
 - : Metal clip
 - ii. Release pawls to separate.
 - : Pawl
 - iii. Disconnect the harness connector from the power seat switch (2) and if necessary remove screws and power seat switch.

- b. For manual seat:
 - i. Remove the seat cushion outer finisher (RH) (2).
 - ii. Release pawl and remove recline lever (1) as shown.
 - iii. Release metal clips (A) from the seat cushion frame (3) as shown (←).
 - : Metal clip
 - iv. Release the remaining pawls then remove the seat cushion outer finisher (RH) (2).
 - : Pawl

9. Remove the seat cushion outer finisher (LH) (1).
 - a. Release pawls then pull to release the metal clip.
 - : Metal clip
 - : Pawl

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

10. Remove the seat cushion trim (1) and seat cushion pad as an assembly.

⇐:Front

- Release J-clips (A) holding the seat cushion trim to the seat cushion frame.
- Release J-clip (B) holding the seat cushion trim to the seat cushion frame.
- Release J-clips (D) holding the seat cushion trim to the seat cushion frame.
- Release retainer strips (C) holding the seat cushion trim to the seat cushion frame.
- Disconnect the harness connector from the seat cushion heater (if equipped).

NOTE:

Take note of harness routing and attachment location for accurate installation.

11. Remove the seat cushion trim (1) and the seat cushion pad from the seat cushion frame.

12. Separate the seat cushion trim (1) from the seat cushion pad.

- Pull the seat cushion trim upward to release hook fasteners (A).
- Remove three hog rings and separate the seat cushion trim from the seat cushion pad.

[]: Hog ring

NOTE:

Remove all pieces of hog rings and discard them.

13. Remove seat cushion heater from seat cushion pad. Refer to [SE-76. "PASSENGER SIDE : Front Seat Heater"](#).
14. Disconnect harness connector from occupant classification system sensors.
15. Slide seat frame to the full forward position, then release clips using a suitable tool and remove seat slide bar (if equipped).

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

16. Remove nuts (A) and separate seat frame (1) from seat track (LH) (2).

CAUTION:

Do not reuse nuts. Replace with new parts during installation.

17. Remove nuts (A) from occupant classification system sensor (1) and remove.

CAUTION:

Do not reuse nuts. Replace with new parts during installation.

NOTE:

Rear sensor shown, front sensor similar.

Assembly

Note the following and assemble in the reverse order of disassembly.

CAUTION:

- Smooth out all wrinkles during assembly.
- Do not damage the harness connector during installation.
- Do not reuse nuts. Replace with new parts during installation.
- Tighten nuts to specification.
 - (1) Front passenger seat frame assembly
 - (2) Front passenger seat track (LH)

Seat track nuts (A)

45N·m (4.6kg-m, 33ft-lb)

- Tighten nut to specification.
 - (1) Occupant classification system sensor

Occupant classification
system sensor nut (A)

22N·m (2.2kg-m, 16ft-lb)

- Always route side air bag module harness in original location. Replace any deformed or damaged clips with same type and color. Always install clips in the original location in the harness.
- After work is completed, check that no system malfunction is detected causing the air bag warning lamp to illuminate.

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

- If a malfunction is detected by the air bag warning lamp after repair or replacement of the malfunction parts, perform the SRS final check. Refer to [SRC-17, "SRS Final Check"](#).
- When installing the seat cushion trim, firmly push down while sliding your hand along the seams as shown (➡) to ensure the hook fasteners below the seat cushion trim are fastened properly.

- Install new hog rings on the seat cushion trim in original positions. Use only one hog ring in each designated location. Ensure hog rings are correctly fastened around both the seat cushion trim and seat cushion pad wires. Use NISSAN standard hog rings and tools to assemble.

INFOID:000000010481847

PASSENGER SIDE : Side air bag module

WARNING:

Do not leave any objects (screwdrivers, tools, etc.) on the seat during seatback repair. It can lead to personal injury if the side air bag should accidentally deploy.

CAUTION:

- Before servicing, turn ignition switch OFF, disconnect both battery terminals and wait at least three minutes.
- Handle the side air bag module carefully. During disassembly, always hold the side air bag module, do not let it hang by the wire harness.
- Always work from the side or back of the seatback, do not work in front of seat.
- Do not use air tools or electric tools for servicing the seat.
- Replace the side air bag module if it has been dropped or sustained an impact.
- Do not insert any objects into the side air bag module.
- Do not attempt to disassemble the side air bag module.
- Do not expose the side air bag module to temperatures exceeding 93°C (200°F).
- Do not expose the side air bag module to any oil, grease, detergent or water.
- During disassembly, do not damage the seatback board, chutes, connectors, retainers, clips, module harness or the side air bag module.

NOTE:

- If the vehicle has been involved in a collision and the side air bag has deployed, the front seatback assembly must be replaced.
- For side air bag module removal and installation, seatback trim and seatback pad must be removed.

REMOVAL

1. Remove the front passenger seat. Refer to [SE-36, "PASSENGER SIDE : Removal and Installation - Seat Assembly"](#).
2. Remove the seatback board. Refer to [SE-37, "PASSENGER SIDE : Removal and Installation - Seatback Board"](#).

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

3. Release the J-clips (A) holding the seatback trim (1) to the seat-back frame.
4. Remove the rear hinge cover (1).
5. Unclip the side air bag module harness at locations (B).

NOTE:

Take note of harness routing and attachment location for accurate installation.

6. From the bottom of the seat.
 - a. Unclip the side air bag module harness (1) at locations (A).
NOTE:
Take note of harness routing and attachment location for accurate installation.
 - b. Disconnect the harness connector (B) from the seatback heater (if equipped).
(C) Harness connector for seat cushion heater

7. Release the headrest holder locks as shown and remove the headrest holders.
CAUTION:
Before removing/installing the headrest holder, check its orientation (front/rear and right/left).

8. Remove and discard the two side air bag module nuts (A).
(1) Side air bag module
CAUTION:
Do not reuse the side air bag module nuts.

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

9. Disengage the side air bag module studs from the seatback frame and lift the seatback cushion trim and seatback pad as an assembly to remove from the seatback frame.
10. Open the seatback cushion and release the side air bag module studs (A) protruding through holes in the chute (B).
11. Pull the side air bag module (1) out of the chute (B) and remove from the seatback trim.

CAUTION:

- Replace the front passenger air bag module if it has been dropped or sustained an impact.
- Do not strike the front passenger air bag module.

INSTALLATION

Installation is in the reverse order of removal.

CAUTION:

- Inspect seatback pad, seatback trim and seatback trim chutes. Replace if damaged.
- Smooth out all wrinkles during assembly.
- Always route side air bag module harness in original location. Replace any deformed or damaged clips with same type and color. Always install clips in the original location in the harness.
- After installation is completed, check that no system malfunction is detected causing the air bag warning lamp to illuminate.
- If a malfunction is detected by the air bag warning lamp after repair or replacement of the malfunction parts, perform the SRS final check. Refer to [SRC-17. "SRS Final Check"](#).

FRONT SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

- When installing the side air bag module, make sure the side air bag chute (4) is pulled over the outboard surface of the side air bag module (3). Make sure there are no wrinkles and the chute is not folded, twisted or pinched.

- (1) Seatback pad
- (2) Frame
- (5) Seatback board

⇐: Front

- Tighten the side air bag nuts to specification. Refer to [SE-61, "PASSENGER SIDE : Exploded View"](#).

CAUTION:

- Do not reuse side air bag module nuts.

ALJIA0682ZZ

PASSENGER SIDE : Front Seat Heater

INFOID:0000000011198909

REMOVAL

Seat Heater - Seatback pad

- Remove seatback pad. Refer to [SE-64, "PASSENGER SIDE : Disassembly and Assembly"](#).
- Carefully remove front seatback heater from seatback pad.

CAUTION:

- Carefully remove seatback heater from seatback pad.
- Do not damage seatback pad when removing seatback heater, if damaged replace seatback pad

INSTALLATION

Seatback pad

- Peel protective backing from front seatback heater and attach to seatback pad.
- Secure the front seatback heater harness to the seatback frame.
- Install the remaining seatback components. Refer to [SE-64, "PASSENGER SIDE : Disassembly and Assembly"](#).

REMOVAL

Seat Heater - Seat cushion pad

- Remove seat cushion pad. Refer to [SE-64, "PASSENGER SIDE : Disassembly and Assembly"](#).
- Carefully remove front seat cushion heater from seat cushion pad.

CAUTION:

- Carefully remove seat cushion heater from seat cushion pad.
- Do not damage seat cushion pad when removing seat cushion heater, if damaged replace seat cushion pad

INSTALLATION

Seat cushion pad

- Peel protective backing from front seat cushion heater and attach to seat cushion pad.
- Secure the front seat cushion heater harness to the seat cushion frame.
- Install the remaining seat cushion components. Refer to [SE-64, "PASSENGER SIDE : Disassembly and Assembly"](#).

SEAT CUSHION

- | | | |
|-----------------------|---------------------|----------------------|
| 1. Seat cushion frame | 2. Seat cushion pad | 3. Seat cushion trim |
| A. Fastening strips | B. Hook fasteners | □ Hog rings |

Clips

Disassembly

- Remove the seat cushion assembly. Refer to [SE-42, "Removal and Installation - Seat Cushion Assembly"](#).
- Remove the two clips that retain the seat cushion trim.
- Release the fastening strips from the seat cushion frame.
- Remove the seat cushion trim and seat cushion pad from the seat cushion frame.
- Separate the seat cushion trim from the seat cushion pad.
 - Pull the seat cushion trim upward to release hook fasteners.
 - Remove the six hog rings and separate the seat cushion trim from the seat cushion pad.

NOTE:

Remove all pieces of hog rings and discard them.

Assembly

Assembly is in the reverse order of disassembly.

CAUTION:

- Make sure hog rings are correctly fastened around both the seat cushion trim and seat cushion pad wires.
- Replace any deformed or damaged hog rings.

REAR SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

- **Make sure any old hog ring pieces are removed from seat.**

NOTE:

- Install new hog rings on the seat cushion trim in original positions.
- Use only one hog ring in each designated location.

- When installing the seat cushion trim, firmly push down while sliding your hand along the seams as shown (➡) to ensure the hook fasteners below the seat cushion trim are fastened properly.

REAR SEATBACK ASSEMBLY (RH) - WITH REMOVABLE HEADREST

Disassembly

1. Remove the rear seatback assembly (RH). Refer to [SE-42, "Removal and Installation - Seat Assembly"](#).
2. Remove the armrest assembly. Refer to [SE-44, "Removal and Installation - Armrest Assembly"](#).
3. Release the J-clip retainer (B) and unzip the seatback trim cover (1).
(A) Zipper

4. Remove the seatback trim and seatback pad (2) from the seatback frame (1).
 - a. Release the J-clip retainers (A) from the seatback frame (1).
 - b. Remove two hog rings that retain seatback pad in place.
[] Hog ring

REAR SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

- c. Release the headrest holder locks as shown and remove the headrest holders (1) from the seatback frame (2).

CAUTION:

Before removing headrest holder, check its orientation (front/rear and right/left).

- d. Remove the seatback trim and seatback pad from the seatback frame.

5. Separate the seatback trim from the seatback pad.
- a. Pull seatback trim (1) upward to release hook fasteners (A).
- b. Remove three hog rings and separate the seatback trim from the seatback pad.

[]: Hog ring

NOTE:

Remove all pieces of hog rings and discard them.

Assembly

Assembly is in the reverse order of disassembly.

CAUTION:

- Make sure hog rings are correctly fastened around both the seatback trim and seatback pad wires.
- Replace any deformed or damaged hog rings.
- Make sure any old hog ring pieces are removed from seat.

NOTE:

- Install new hog rings on the seatback trim in original positions.
- Use only one hog ring in each designated location.

- When installing the seatback trim, firmly push down while sliding your hand along the seams as shown (←) to ensure the hook fasteners below the seatback trim are fastened properly.

REAR SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

REAR SEATBACK ASSEMBLY (RH) - WITHOUT REMOVABLE HEADREST

Disassembly

1. Remove the rear seatback assembly (RH). Refer to [SE-42, "Removal and Installation - Seat Assembly"](#).
2. Remove the armrest assembly. Refer to [SE-44, "Removal and Installation - Armrest Assembly"](#).
3. Release the J-clip retainer (B) and unzip the seatback trim cover (1).
(A) Zipper

4. Remove the seatback trim and seatback pad (2) from the seatback frame (1).
 - a. Release the J-clip retainers (A).
 - b. Remove two hog rings that retain seatback pad in place.
[] Hog ring
 - c. Remove the seatback trim and seatback pad from the seatback frame.

5. Separate the seatback trim from the seatback pad.
 - a. Pull seatback trim (1) upward to release hook fasteners (A).
 - b. Remove three hog rings and separate the seatback trim from the seatback pad.

[] Hog ring

NOTE:

Remove all pieces of hog rings and discard them.

Assembly

Assembly is in the reverse order of disassembly.

CAUTION:

- Make sure hog rings are correctly fastened around both the seatback trim and seatback pad wires.
- Replace any deformed or damaged hog rings.
- Make sure any old hog ring pieces are removed from seat.

NOTE:

REAR SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

- Install new hog rings on the seatback trim in original positions.
- Use only one hog ring in each designated location.

- When installing the seatback trim, firmly push down while sliding your hand along the seams as shown (➡) to ensure the hook fasteners below the seatback trim are fastened properly.

REAR SEATBACK ASSEMBLY (LH) - WITH REMOVABLE HEADREST

Disassembly

1. Remove the rear seatback assembly (LH). Refer to [SE-42, "Removal and Installation - Seat Assembly"](#).
2. Release the J-clip retainer (B) and unzip the seatback trim cover (1).
(A) Zipper

3. Remove the seatback trim and seatback pad (2) from the seatback frame (1).
 - a. Release the J-clip retainer (A).

REAR SEAT

< UNIT DISASSEMBLY AND ASSEMBLY >

- b. Release the headrest holder locks as shown and remove the headrest holders (1) from the seatback frame (2).

CAUTION:

Before removing headrest holder, check its orientation (front/rear and right/left).

- c. Remove the seatback trim and seatback pad from the seatback frame.

4. Separate the seatback trim (1) from the seatback pad.
 - a. Pull seatback trim upward to release hook fasteners (A).
 - b. Remove three hog rings and separate the seatback trim from the seatback pad.

[]: Hog ring

NOTE:

Remove all pieces of hog rings and discard them.

Assembly

Assembly is in the reverse order of disassembly.

CAUTION:

- Make sure hog rings are correctly fastened around both the seatback trim and seatback pad wires.
- Replace any deformed or damaged hog rings.
- Make sure any old hog ring pieces are removed from seat.

NOTE:

- Install new hog rings on the seatback trim in original positions.
- Use only one hog ring in each designated location.

- When installing the seatback trim, firmly push down while sliding your hand along the seams as shown (↔) to ensure the hook fasteners below the seatback trim are fastened properly.
