# < PRECAUTION > PRECAUTION PRECAUTIONS

Precaution for Supplemental Restraint System (SRS) "AIR BAG" and "SEAT BELT PRE-TENSIONER"

The Supplemental Restraint System such as "AIR BAG" and "SEAT BELT PRE-TENSIONER", used along with a front seat belt, helps to reduce the risk or severity of injury to the driver and front passenger for certain types of collision. This system includes seat belt switch inputs and dual stage front air bag modules. The SRS system uses the seat belt switches to determine the front air bag deployment, and may only deploy one front air bag, depending on the severity of a collision and whether the front occupants are belted or unbelted. Information necessary to service the system safely is included in the "SRS AIR BAG" and "SEAT BELT" of this Service Manual.

#### WARNING:

- To avoid rendering the SRS inoperative, which could increase the risk of personal injury or death in the event of a collision that would result in air bag inflation, all maintenance must be performed by an authorized NISSAN/INFINITI dealer.
- Improper maintenance, including incorrect removal and installation of the SRS, can lead to personal injury caused by unintentional activation of the system. For removal of Spiral Cable and Air Bag Module, see the "SRS AIR BAG".
- Do not use electrical test equipment on any circuit related to the SRS unless instructed to in this Service Manual. SRS wiring harnesses can be identified by yellow and/or orange harnesses or harness connectors.

PRECAUTIONS WHEN USING POWER TOOLS (AIR OR ELECTRIC) AND HAMMERS

#### WARNING:

- When working near the Air Bag Diagnosis Sensor Unit or other Air Bag System sensors with the ignition ON or engine running, DO NOT use air or electric power tools or strike near the sensor(s) with a hammer. Heavy vibration could activate the sensor(s) and deploy the air bag(s), possibly causing serious injury.
- When using air or electric power tools or hammers, always switch the ignition OFF, disconnect the battery, and wait at least 3 minutes before performing any service.

## SYSTEM BODY CONTROL SYSTEM

## **BODY CONTROL SYSTEM : System Description**

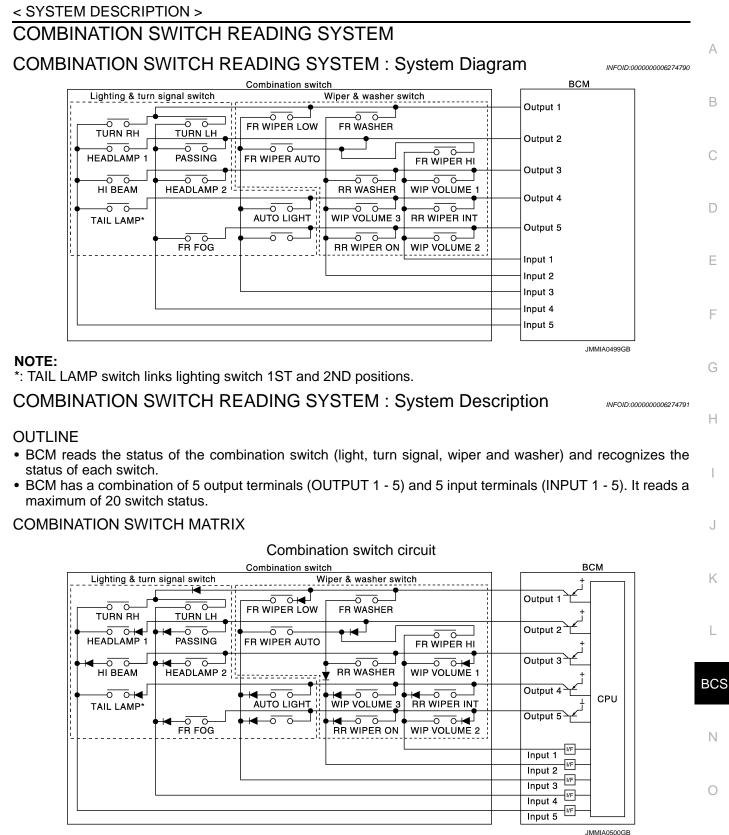

INFOID:000000006274789

OUTLINE

- BCM (Body Control Module) controls the various electrical components. It inputs the information required to the control from CAN communication and the signal received from each switch and sensor.
- BCM has combination switch reading function for reading the operation status of combination switches (light, turn signal, wiper and washer) in addition to a function for controlling the operation of various electrical components. It also has the signal transmission function as the passed point of signal and the power saving control function that reduces the power consumption with the ignition switch OFF.
- BCM is equipped with the diagnosis function that performs the diagnosis with CONSULT-III and various settings.

#### BCM CONTROL FUNCTION LIST

#### NOTE:

Headlamp has a dual system switch.

#### COMBINATION SWITCH READING FUNCTION

Description

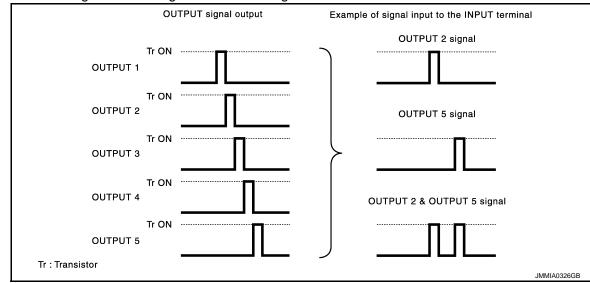

· BCM reads the status of the combination switch at 10 ms interval normally.

#### NOTE:

BCM reads the status of the combination switch at 60 ms interval when BCM is controlled at low power consumption control mode.

- BCM operates as follows and judges the status of the combination switch.
- It operates the transistor on OUTPUT side in the following order: OUTPUT  $1 \rightarrow 2 \rightarrow 3 \rightarrow 4 \rightarrow 5$ , and outputs voltage waveform.
- The voltage waveform of OUTPUT corresponding to the formed circuit is input into the interface on INPUT side if any (1 or more) switches are ON.
- It reads this change of the voltage as the status signal of the combination switch.

#### **Operation Example**

In the following operation example, the combination of the status signals of the combination switch is replaced as follows: INPUT 1 - 5 to "1 - 5" and OUTPUT 1 - 5 to "A - E".

Example 1: When a switch (TAIL LAMP switch) is turned ON

#### < SYSTEM DESCRIPTION >

- The circuit between OUTPUT 4 and INPUT 5 is formed when the TAIL LAMP switch is turned ON. всм Combination switch Lighting & turn signal switch Wiper & washer switch īđ FR WIPER LOW 0 0 Output 1 **A** 5 0 -0 0 FR WASHER TURN RH TURN LH
  - HEADLAMP 1 ₩ Output 2 -0 0 С B PASSING FR WIPER AUTO Output 3 \_\_\_\_\_ 5  $\overline{-}$ 0 C HI BEĂM HEADLAMP 2 **BR WASHER** 4 Output 4 ⊽⊣∢ -0 0 0 D RR WIPER INT TAIL LAMP Output 5 ៰៰₄ᠯ -0 0 E ō 0 FR FOG **RR WIPER ON** WIP VOLUME 2 ന - I/F Input 1 2 l/F Input 2 3 - I/F Input 3 4 I/F Input 4 ⇒ 5 I/F Input 5
- BCM detects the combination switch status signal "5D" when the signal of OUTPUT 4 is input to INPUT 5.
- BCM judges that the TAIL LAMP switch is ON when the signal "5D" is detected.
- Example 2: When some switches (TURN RH switch, TAIL LAMP switch) are turned ON

• The circuits between OUTPUT 1 and INPUT 5 and between OUTPUT 4 and INPUT 5 are formed when the TURN RH switch and TAIL LAMP switch are turned ON.

| Combination switch<br>Lighting & turn signal switch Wiper & washer switch  | 1. | BCM                                      | Н |

| ▶  |    | Input 3<br>Input 4<br>Input 4<br>Input 5 | L |

- BCM detects the combination switch status signal "5AD" when the signals of OUTPUT 1 and OUTPUT 4 are input to INPUT 5.
- BCM judges that the TURN RH switch and TAIL LAMP switch are ON when the signal "5AD" is detected.

#### WIPER VOLUME DIAL POSITION

BCM judges the wiper volume dial 1 - 7 by the status of WIP VOLUME 1, 2 and 3 switches.

| Wiper volume  |              | Switch status |              |   |

## POWER CONSUMPTION CONTROL SYSTEM POWER CONSUMPTION CONTROL SYSTEM : System Diagram

## POWER CONSUMPTION CONTROL SYSTEM : System Description

INFOID:00000006274795

Ρ

INFOID:000000006274794

#### OUTLINE

- BCM incorporates a power saving control function that reduces the power consumption according to the vehicle status.
- BCM switches the status (control mode) by itself with the power saving control function. It performs the sleep request to each unit (IPDM E/R, combination meter, driver seat control unit, automatic back door control module, pre-crash seat belt control unit and CAN gateway) that operates with the ignition switch OFF.

Normal mode (wake-up)

- CAN communication is normally performed with other units
- Each control with BCM is operating properly

CAN communication sleep mode (CAN sleep)

- CAN transmission is stopped
- Control with BCM only is operating

#### < SYSTEM DESCRIPTION >

Low power consumption mode (BCM sleep)

- Low power consumption control is active
- CAN transmission is stopped

#### LOW POWER CONSUMPTION CONTROL WITH BCM

BCM reduces the power consumption with the following operation in the low power consumption mode.

• The reading interval of the each switches changes from 10 ms interval to 60 ms interval.

#### Sleep mode activation

- BCM receives the sleep-ready signal (ready) from IPDM E/R, combination meter and automatic back door control module via CAN communication.
- BCM transmits the sleep wake up signal (sleep) to each unit when all of the CAN sleep conditions are fulfilled.
- Each unit stops the transmission of CAN communication with the sleep wake up signal. BCM is in CAN communication sleep mode.
- BCM is in the low power consumption mode and perform the low power consumption control when all of the BCM sleep conditions are fulfilled with CAN sleep condition.

Sleep condition

| CAN sleep condition   | BCM sleep condition  |

Wake-up operation

- BCM transmits sleep wake up signal (wake up) to each unit when any condition listed below is established, and then goes into normal mode from low power consumption mode.
- Each unit starts transmissions with CAN communication by receiving sleep wake up signals. Each unit transmit wake up signals to BCM with CAN communication to convey the start of CAN communication.

## < SYSTEM DESCRIPTION >

| Wake-up condition  | A |
|--|---|
| Receiving the sleep-ready signal (Not-ready) from any units                            |   |

## < SYSTEM DESCRIPTION >

## DIAGNOSIS SYSTEM (BCM) COMMON ITEM

## COMMON ITEM : CONSULT-III Function (BCM - COMMON ITEM)

INFOID:000000006274796

## APPLICATION ITEM

CONSULT-III performs the following functions via CAN communication with BCM.

| Diagnosis mode           | Function Description   |
|--------------------------|--|
| Work Support             | Changes the setting for each system function.  |
| Self Diagnostic Result   | Displays the diagnosis results judged by BCM. Refer to BCS-57, "DTC Index".  |
| CAN Diag Support Monitor | Monitors the reception status of CAN communication viewed from BCM. Refer to CONSULT-III opera-<br>tion manual.        |
| Data Monitor             | The BCM input/output signals are displayed.  |
| Active Test              | The signals used to activate each device are forcibly supplied from BCM.   |
| Ecu Identification       | The BCM part number is displayed.  |
| Configuration            | <ul><li>Read and save the vehicle specification.</li><li>Write the vehicle specification when replacing BCM.</li></ul> |

#### SYSTEM APPLICATION

BCM can perform the following functions for each system.

#### NOTE:

It can perform the diagnosis modes except the following for all sub system selection items.

| System   | Out and a start and the start | Diagnosis mode |              |             |
|--|-------------------------------|----------------|--------------|-------------|
| System   | Sub system selection item     | Work Support   | Data Monitor | Active Test |
| Door lock  | DOOR LOCK                     | ×              | ×            | ×           |
| Rear window defogger   | REAR DEFOGGER                 |                | ×            | ×           |
| Warning chime  | BUZZER                        |                | ×            | ×           |
| Interior room lamp timer   | INT LAMP                      | ×              | ×            | ×           |
| Exterior lamp  | HEAD LAMP                     | ×              | ×            | ×           |
| Wiper and washer   | WIPER                         | ×              | ×            | ×           |
| Turn signal and hazard warning lamps                                 | FLASHER                       | ×              | ×            | ×           |
| —  | AIR CONDITONER*               |                | ×            | ×           |
| <ul><li>Intelligent Key system</li><li>Engine start system</li></ul> | INTELLIGENT KEY               | ×              | ×            | ×           |
| Combination switch   | COMB SW                       |                | ×            |             |
| Body control system  | BCM                           | ×              |              |             |
| IVIS   | IMMU                          | ×              | ×            | ×           |
| Interior room lamp battery saver                                     | BATTERY SAVER                 | ×              | ×            | ×           |
| Back door  | TRUNK                         |                | ×            |             |
| Vehicle security system  | THEFT ALM                     | ×              | ×            | ×           |
| RAP system   | RETAINED PWR                  |                | ×            |             |
| Signal buffer system   | SIGNAL BUFFER                 |                | ×            | ×           |

\*: This item is indicated, but not used.

#### FREEZE FRAME DATA (FFD)

The BCM records the following vehicle condition at the time a particular DTC is detected, and displays on CONSULT-III.

#### < SYSTEM DESCRIPTION >

| CONSULT screen item | Indication/Unit | Description   |   |  |
|---------------------|-----------------|---|---|--|
| Vehicle Speed       | km/h            | Vehicle speed of the moment a particular DTC is detected  |   |  |
| Odo/Trip Meter      | km              | Total mileage (Odometer   | r value) of the moment a particular DTC is detected   |  |
|                     | SLEEP>LOCK      | -   | While turning BCM status from low power consumption mode to normal mode (Power supply position is "LOCK")   |  |
|                     | SLEEP>OFF       |   | While turning BCM status from low power consumption mode to normal mode (Power supply position is "OFF".)   |  |
|                     | LOCK>ACC        |   | While turning power supply position from "LOCK" to "ACC"  |  |
|                     | ACC>ON          |   | While turning power supply position from "ACC" to "IGN"   |  |
|                     | RUN>ACC         |   | While turning power supply position from "RUN" to "ACC" (Vehicle is stopping and selector lever is except P position.)  |  |
|                     | CRANK>RUN       |   | While turning power supply position from "CRANKING" to "RUN" (From cranking up the engine to run it)  |  |
|                     | RUN>URGENT      | Power position status of<br>the moment a particular<br>DTC is detected                            | While turning power supply position from "RUN" to "ACC" (Emer-<br>gency stop operation)   |  |
|                     | ACC>OFF         |   | While turning power supply position from "ACC" to "OFF"   |  |
|                     | OFF>LOCK        |   | While turning power supply position from "OFF" to "LOCK"  |  |
| Vehicle Condition   | OFF>ACC         |   | While turning power supply position from "OFF" to "ACC"   |  |
|                     | ON>CRANK        |   | While turning power supply position from "IGN" to "CRANKING"  |  |
|                     | OFF>SLEEP       |   | While turning BCM status from normal mode (Power supply posi-<br>tion is "OFF".) to low power consumption mode  |  |
|                     | LOCK>SLEEP      |   | While turning BCM status from normal mode (Power supply posi-<br>tion is "LOCK".) to low power consumption mode   |  |
|                     | LOCK            |   | Power supply position is "LOCK" (Ignition switch OFF with steer-<br>ing is locked.)   |  |
|                     | OFF             |   | Power supply position is "OFF" (Ignition switch OFF with steering is unlocked.)   |  |
|                     | ACC             |   | Power supply position is "ACC" (Ignition switch ACC)  |  |
|                     | ON              |   | Power supply position is "IGN" (Ignition switch ON with engine stopped)   |  |
|                     | ENGINE RUN      |   | Power supply position is "RUN" (Ignition switch ON with engine running)   |  |
|                     | CRANKING        |   | Power supply position is "CRANKING" (At engine cranking)  |  |
| IGN Counter         | 0 - 39          | <ul> <li>The number is 0 when</li> <li>The number increases<br/>whenever ignition swit</li> </ul> | t ignition switch is turned ON after DTC is detected<br>a malfunction is detected now.<br>If like $1 \rightarrow 2 \rightarrow 338 \rightarrow 39$ after returning to the normal condition<br>the OFF $\rightarrow$ ON. |  |

#### DATA MONITOR

| Monitor Item   | Condition  |  |
|----------------|--|--|
| REQ SW -DR     | Indicates [On/Off] condition of door request switch (driver side)    |  |
| REQ SW -AS     | Indicates [On/Off] condition of door request switch (passenger side) |  |
| REQ SW -BD/TR  | Indicates [On/Off] condition of back door request switch             |  |
| PUSH SW        | Indicates [On/Off] condition of push-button ignition switch          |  |
| CLUTCH SW      | NOTE:<br>This item is displayed, but cannot be monitored             |  |
| BRAKE SW 1     | Indicates [On/Off]* condition of stop lamp switch power supply       |  |
| BRAKE SW 2     | Indicates [On/Off] condition of stop lamp switch                     |  |
| DETE/CANCL SW  | Indicates [On/Off] condition of P position                           |  |
| SFT PN/N SW    | Indicates [On/Off] condition of P or N position                      |  |
| S/L -LOCK      | Indicates [On/Off] condition of steering lock unit (LOCK)            |  |
| S/L -UNLOCK    | Indicates [On/Off] condition of steering lock unit (UNLOCK)          |  |
| S/L RELAY -F/B | Indicates [On/Off] condition of steering lock relay                  |  |
| UNLK SEN -DR   | Indicates [On/Off] condition of driver door UNLOCK status            |  |
| PUSH SW -IPDM  | Indicates [On/Off] condition of push-button ignition switch          |  |
| IGN RLY1 -F/B  | Indicates [On/Off] condition of ignition relay 1                     |  |
| DETE SW -IPDM  | Indicates [On/Off] condition of P position                           |  |

Revision: 2010 May

Κ

#### < SYSTEM DESCRIPTION >

| Monitor Item  | Condition  |
|---------------|--|
| SFT PN -IPDM  | Indicates [On/Off] condition of P or N position  |
| SFT P -MET    | Indicates [On/Off] condition of P position   |
| SFT N -MET    | Indicates [On/Off] condition of N position   |
| ENGINE STATE  | Indicates [Stop/Stall/Crank/Run] condition of engine states  |
| S/L LOCK-IPDM | Indicates [On/Off] condition of steering lock unit (LOCK)  |
| S/L UNLK-IPDM | Indicates [On/Off] condition of steering lock unit (UNLOCK)  |
| S/L RELAY-REQ | Indicates [On/Off] condition of steering lock relay  |
| VEH SPEED 1   | Display the vehicle speed signal received from combination meter by numerical value [Km/h]   |
| VEH SPEED 2   | Display the vehicle speed signal received from ABS or VDC or TCM by numerical value [Km/h]   |
| DOOR STAT-DR  | Indicates [LOCK/READY/UNLK] condition of unlock sensor   |
| DOOR STAT-AS  | Indicates [LOCK/READY/UNLK] condition of passenger side door status  |
| ID OK FLAG    | Indicates [Set/Reset] condition of key ID  |
| PRMT ENG STRT | Indicates [Set/Reset] condition of engine start possibility  |
| PRMT RKE STRT | NOTE:<br>This item is displayed, but cannot be monitored   |
| TRNK/HAT MNTR | NOTE:<br>This item is displayed, but cannot be monitored   |
| RKE-LOCK      | Indicates [On/Off] condition of LOCK signal from Intelligent Key   |
| RKE-UNLOCK    | Indicates [On/Off] condition of UNLOCK signal from Intelligent Key   |
| RKE-TR/BD     | NOTE:<br>This item is displayed, but cannot be monitored   |
| RKE-PANIC     | Indicates [On/Off] condition of PANIC button of Intelligent Key  |
| RKE-MODE CHG  | Indicates [On/Off] condition of MODE CHANGE signal from Intelligent Key  |
| RKE OPE COUN1 | When remote keyless entry receiver receives the signal transmitted while operating on Intelli-<br>gent Key, the numerical value start changing |
| RKE OPE COUN2 | <b>NOTE:</b><br>This item is displayed, but cannot be monitored  |

\*: OFF is displayed when brake pedal is depressed while brake switch power supply is OFF.

#### ACTIVE TEST

| Test item      | Description  |
|----------------|--|
| BATTERY SAVER  | <ul><li>This test is able to check interior room lamp operation</li><li>On: Operate</li><li>Off: Non-operation</li></ul>   |

|                 | The key ID that the key slot receives is not recognized by any key ID reg-<br>istered to BCM.    | Yet                                    |
| CONFRM ID ALL   | The key ID that the key slot receives is recognized by any key ID registered to BCM.             | Done                                   |
| CONFIRM ID4     | The key ID that the key slot receives is not recognized by the fourth key ID registered to BCM.  | Yet                                    |
|                 | The key ID that the key slot receives is recognized by the fourth key ID reg-<br>istered to BCM. | Done                                   |
|                 | The key ID that the key slot receives is not recognized by the third key ID registered to BCM.   | Yet                                    |
| CONFIRM ID3     | The key ID that the key slot receives is recognized by the third key ID reg-<br>istered to BCM.  | Done                                   |

#### < ECU DIAGNOSIS INFORMATION >

| Monitor Item   | Condition   | Value/Status |
|----------------|---|--------------|
| CONFIRM ID2    | The key ID that the key slot receives is not recognized by the second key ID registered to BCM. | Yet          |
|                | The key ID that the key slot receives is recognized by the second key ID registered to BCM.     | Done         |
| CONFIRM ID1    | The key ID that the key slot receives is not recognized by the first key ID registered to BCM.  | Yet          |
| CONFIRMIDI     | The key ID that the key slot receives is recognized by the first key ID reg-<br>istered to BCM. | Done         |
| NOT REGISTERED | BCM detects registered key ID, or BCM does not detect key ID.                                   | ID OK        |
|                | BCM detects non-registration key ID.  | ID NG        |
| TP 4           | The ID of fourth key is not registered to BCM   | Yet          |
| 1F 4           | The ID of fourth key is registered to BCM   | Done         |
| TP 3           | The ID of third key is not registered to BCM  | Yet          |
| 1 - 3          | The ID of third key is registered to BCM  | Done         |
| TP 2           | The ID of second key is not registered to BCM   | Yet          |
| 1              | The ID of second key is registered to BCM   | Done         |
| TP 1           | The ID of first key is not registered to BCM  | Yet          |
| 1 - 1          | The ID of first key is registered to BCM  | Done         |
| BUZZER         | Tire pressure warning alarm is not sounding   | Off          |
|                | Tire pressure warning alarm is sounding   | On           |

| U0415: VEHICLE SPEED        | Inhibit steering lock                                     | When vehicle speed signal (Meter) (CAN) is received normally   |

#### FAIL-SAFE CONTROL BY RAIN SENSOR MALFUNCTION

BCM detects the light and rain sensor serial link error and the rain sensor malfunction.

- BCM controls the following fail-safe when rain sensor has a malfunction.
- Front wiper switch AUTO and sensing rain drop: The condition just before the activation of fail-safe is maintained until the front wiper switch is turned OFF.
- Front wiper switch AUTO and not sensing rain drop: Front wiper is LO operation until the front wiper switch is turned off.

#### REAR WIPER MOTOR PROTECTION

BCM detects the rear wiper stopping position according to the rear wiper stop position signal. When the rear wiper stop position signal does not change for more than 5 seconds while driving the rear wiper, BCM stops power supply to protect the rear wiper motor.

Condition of cancellation

- 1. More than 1 minute is passed after the rear wiper stop.
- 2. Turn rear wiper switch OFF.
- 3. Operate the rear wiper switch or rear washer switch.

FAIL-SAFE CONTROL OF COMBINATION SWITCH READING FUNCTION CAUSED BY LOW POWER SUPPLY VOLTAGE

If voltage of battery power supply lower, BCM maintains combination switch reading to the status when input voltage is less than approximately 9 V.

#### NOTE:

When voltage of battery power supply is approximately 9 V or more, combination switch reading function returns to normal operation.

#### DTC Inspection Priority Chart

INFOID:000000006274821

If some DTCs are displayed at the same time, perform inspections one by one based on the following priority chart.

| Priority | DTC   |
|----------|---|
| 1        | B2562: LOW VOLTAGE  |
| 2        | U1000: CAN COMM     U1010: CONTROL UNIT (CAN)   |
| 3        | <ul> <li>B2192: ID DISCORD BCM-ECM</li> <li>B2193: CHAIN OF BCM-ECM</li> <li>B2195: ANTI-SCANNING</li> <li>B2198: NATS ANTENNA AMP</li> </ul> |

# DTC Index

#### NOTE:

The details of time display are as follows.

• CRNT: A malfunction is detected now.

• PAST: A malfunction was detected in the past.

IGN counter is displayed on Freeze Frame Data. For details of Freeze Frame Data, refer to <u>BCS-14. "COM-MON ITEM : CONSULT-III Function (BCM - COMMON ITEM)"</u>.

| 2.REPLACE BCM   |     |
| Replace BCM. Refer to BCS-81, "Removal and Installation".   | L   |
| >> GO TO 3.   |     |
| 3.WRITING VEHICLE SPECIFICATION   | BCS |
| CONSULT-III Configuration<br>Perform "WRITE CONFIGURATION - Config file" or "WRITE CONFIGURATION - Manual selection" to write<br>vehicle specification. Refer to <u>BCS-68, "CONFIGURATION (BCM) : Work Procedure"</u> .  | Ν   |
| >> GO TO 4.   | 0   |
| 4.INITIALIZE BCM (NATS)   | 5   |
| Perform BCM initialization. (NATS)  | Ρ   |
| >> WORK END<br>CONFIGURATION (BCM)  |     |
| CONFIGURATION (BCM) : Description   |     |

Vehicle specification needs to be written with CONSULT-III because it is not written after replacing BCM.

# **INSPECTION AND ADJUSTMENT**

< BASIC INSPECTION >

Configuration has three functions as follows.

| Function                               | Description   |
|--|---|
| READ CONFIGURATION                     | <ul><li>Reads the vehicle configuration of current BCM.</li><li>Saves the read vehicle configuration.</li></ul> |
| WRITE CONFIGURATION - Manual selection | Writes the vehicle configuration with manual selection.   |
| WRITE CONFIGURATION - Config file      | Writes the vehicle configuration with saved data.   |

#### NOTE:

Manual setting item: Items which need selection by vehicle specifications

Automatic setting item: Items which are written in automatically (Setting can not be changed)

#### **CAUTION:**

- When replacing BCM, you must perform "WRITE CONFIGURATION" with CONSULT-III.
- Complete the procedure of "WRITE CONFIGURATION" in order.
- If you set incorrect "WRITE CONFIGURATION", incidents might occur.
- Configuration is different for each vehicle model. Confirm configuration of each vehicle model.
- Never perform "WRITE CONFIGURATION" except for new BCM.

#### CONFIGURATION (BCM) : Work Procedure

INFOID:000000006324911

**1.**WRITING MODE SELECTION

CONSULT-III Configuration
 Select "CONFIGURATION" of BCM.

When writing saved data>>GO TO 2.

When writing manually>>GO TO 3.

2.PERFORM "WRITE CONFIGURATION - CONFIG FILE"

CONSULT-III Configuration
 Perform "WRITE CONFIGURATION - Config file".

>> WORK END

# **3.** PERFORM "WRITE CONFIGURATION - MANUAL SELECTION"

#### CONSULT-III Configuration

- 1. Select "WRITE CONFIGURATION Manual selection".
- Identify the correct model and configuration list. Refer to <u>BCS-69. "CONFIGURATION (BCM) : Configura-</u> tion list".
- 3. Confirm and/or change setting value for each item. CAUTION:
  - Thoroughly read and understand the vehicle specification. Incorrect settings may result in abnormal control of ECU.
  - If items are not displayed, touch "SETTING". Refer to <u>BCS-69, "CONFIGURATION (BCM) : Con-</u> <u>figuration list"</u> for written items and setting value.
- Select "SETTING".
   CAUTION:

Make sure to select "SETTING" even if the indicated configuration of brand new BCM is same as the desirable configuration. If not, configuration which is set automatically by selecting vehicle model can not be memorized.

5. When "COMMAND FINISHED", select "END".

>> GO TO 4.

#### **4.**OPERATION CHECK

Confirm that each function controlled by BCM operates normally.

>> WORK END

## **INSPECTION AND ADJUSTMENT**

< BASIC INSPECTION >

# CONFIGURATION (BCM) : Configuration list

INFOID:000000006274828

А

Items and setting value that are written in BCM by the write configuration can be checked by "READ CONFIG-URATION" as shown in the following table.

| NOTE | GITEM         | SETTING                   |
|------|---------------|---------------------------|
| NOTE | Setting value | Items                     |
|      | WITH          | HZRD (SHCK DTCT ULK) FUNC |
|      | WITHOUT       | UNLOCK WITH SHOCK         |

#### < DTC/CIRCUIT DIAGNOSIS >

# DTC/CIRCUIT DIAGNOSIS U1000 CAN COMM

## Description

INFOID:000000006274829

CAN (Controller Area Network) is a serial communication line for real time applications. It is an on-vehicle multiplex communication line with high data communication speed and excellent error detection ability. Modern vehicle is equipped with many electronic control unit, and each control unit shares information and links with other control units during operation (not independent). In CAN communication, control units are connected with 2 communication lines (CAN H-line, CAN L-line) allowing a high rate of information transmission with less wiring. Each control unit transmits/receives data but selectively reads required data only. CAN Communication Signal Chart. Refer to LAN-28, "CAN COMMUNICATION SYSTEM : CAN Communication Signal Chart".

#### DTC Logic

INFOID:000000006274830

INFOID:000000006274831

#### DTC DETECTION LOGIC

| DTC   | DTC CONSULT-III display<br>description DTC Detection Condition |  | Possible cause           |
|-------|--|--|--------------------------|
| U1000 | CAN COMM   | When BCM cannot communicate CAN com-<br>munication signal continuously for 2 seconds<br>or more. | CAN communication system |

## **Diagnosis Procedure**

**1.**PERFORM SELF DIAGNOSTIC

- 1. Turn ignition switch ON and wait for 2 seconds or more.
- 2. Check "Self Diagnostic Result" of BCM.

#### Is DTC "U1000" displayed?

- YES >> Refer to LAN-18, "Trouble Diagnosis Flow Chart".
- NO >> Refer to <u>GI-40, "Intermittent Incident"</u>.

## **U1010 CONTROL UNIT (CAN)**

# **U0415 VEHICLE SPEED**

## Description

INFOID:000000006274834

U0415 is displayed if any unusual condition is present in the reception status of the vehicle speed signal from the ABS actuator and electric unit (control unit).

## DTC Logic

INFOID:000000006274835

#### DTC DETECTION LOGIC

| DTC   | CONSULT-III display<br>description | DTC Detection Condition   | Probable cause  |
|-------|------------------------------------|---|---|
| U0415 | VEHICLE SPEED                      | When the vehicle speed signal received from<br>the ABS actuator and electric unit (control<br>unit) remains abnormal for 2 seconds or more. | <ul><li>ABS actuator and electric unit (control unit)</li><li>BCM</li></ul> |

#### DTC CONFIRMATION PROCEDURE

#### **1.**DTC CONFIRMATION

- 1. Erase the DTC.
- 2. Turn ignition switch OFF.
- 3. Perform the "Self Diagnostic Result" of BCM with CONSULT-III, when passed 2 seconds or more after the ignition switch is turned ON.

#### Is any DTC detected?

- YES >> Refer to BCS-72, "Diagnosis Procedure".
- NO >> INSPECTION END

#### Diagnosis Procedure

INFOID:000000006274836

# **1.**ABS ACTUATOR AND ELECTRIC UNIT (CONTROL UNIT) SELF-DIAG RESULTS

Perform "Self-Diagnostic Result" of ABS actuator and electric unit (control unit) with CONSULT-III. Refer to BRC-40, "CONSULT-III Function".

#### Is any DTC detected?

- YES >> Repair or replace the malfunctioning part.
- NO >> Replace BCM. Refer to <u>BCS-81, "Removal and Installation"</u>.

#### < DTC/CIRCUIT DIAGNOSIS >

## B26E7 TPMS CAN COMM

## **DTC** Logic

INFOID:000000006274839

INFOID:000000006274840

#### DTC DETECTION LOGIC

| DTC   | CONSULT-III display description | DTC Detection Condition   | Probable cause  |  |
|-------|---------------------------------|---|---|--|
| B26E7 | TPMS CAN COMM                   | When ignition switch is ON, BCM cannot re-<br>ceived CAN communication signal from low<br>tire pressure warning control unit. | <ul><li>CAN communication system</li><li>Low tire pressure warning control unit</li><li>BCM</li></ul> |  |

#### DTC CONFIRMATION PROCEDURE

#### **1.**DTC CONFIRMATION

- 1. Erase the DTC.
- 2. Turn ignition switch OFF.
- 3. Perform the "Self Diagnostic Result" of BCM with CONSULT-III, when passed 2 seconds or more after the ignition switch is turned ON.

Is any DTC detected?

- YES >> Refer to <u>BCS-74, "Diagnosis Procedure"</u>.
- NO >> INSPECTION END

#### Diagnosis Procedure

#### NOTE:

If DTC "B26E7" detected along with DTC "U1000", first diagnose the DTC "U1000". Refer to <u>BCS-70, "Diagno-sis Procedure"</u>.

**1.**LOW TIRE PRESSURE WARNING CONTROL UNIT SELF DIAGNOSTIC RESULT

Perform "Self Diagnostic Result" of low tire pressure warning control unit with CONSULT-III. Refer to <u>WT-12</u>, <u>"CONSULT-III Function"</u>.

Is any DTC detected?

YES >> GO TO 2.

NO >> GO TO 4.

#### **2.**LOW TIRE PRESSURE WARNING CONTROL UNIT DIAGNOSIS

Perform low tire pressure warning control unit component diagnosis of detected DTC. Refer to <u>WT-18, "DTC Index"</u>.

>> GO TO 3.

**3.**BCM SELF DIAGNOSTIC RESULT

Erase DTC of BCM, and perform "Self Diagnostic Result" again.

Is DTC "B26E7" detected?

YES >> Replace BCM. Refer to <u>BCS-81, "Removal and Installation"</u>.

NO >> INSPECTION END

**4.**REPLACE LOW TIRE PRESSURE WARNING CONTROL UNIT TEMPORARILY

Remove low tire pressure warning control unit, and install normal low tire pressure warning control unit.

>> GO TO 5.

**5.**BCM SELF-DIAGNOSTIC RESULT

Erase DTC of BCM, and perform "Self Diagnostic Result" of BCM again.

Is DTC "B26E7" detected?

YES >> Replace BCM. Refer to <u>BCS-81, "Removal and Installation"</u>.

NO >> Replace low tire pressure warning control unit. Refer to WT-65, "Removal and Installation".

| INPUT 3 | M68       | 4        |        | <u>33. "Refer-</u><br>ence Value". |  |
| INPUT 4 |           | 3        |        |                                    |  |
| INPUT 5 |           | 2        |        |                                    |  |

#### Is the measurement value normal?

Yes >> Replace BCM. Refer to <u>BCS-81, "Removal and Installation"</u>.

## **BCS-78**

# **COMBINATION SWITCH INPUT CIRCUIT**

| No >> Replace combined and the second | nation switch. |

## **COMBINATION SWITCH SYSTEM SYMPTOMS**

#### < SYMPTOM DIAGNOSIS >

# SYMPTOM DIAGNOSIS COMBINATION SWITCH SYSTEM SYMPTOMS

## Symptom Table

INFOID:000000006274844

- 1. Perform "Data Monitor" of CONSULT-III to check for any malfunctioning item.
- 2. Check the malfunction combinations.

|             | Data monitor item |              |              |             |              |              |            |               |               |              |            |                |                |            |               |           |                                   |

# COMBINATION SWITCH

## **Exploded View**

INFOID:000000006274846

- 1. Combination switch
- 2. Combination switch connector

# Removal and Installation

#### REMOVAL

- 1. Remove steering column cover. Refer to <u>IP-13, "Exploded View"</u>.
- 2. Remove screws.
- 3. Disconnect the connector.
- 4. Pull up the combination switch to remove it.

#### INSTALLATION

Install in the reverse order of removal.
