# Precaution for Supplemental Restraint System (SRS) "AIR BAG" and "SEAT BELT PRE-TENSIONER"

The Supplemental Restraint System such as "AIR BAG" and "SEAT BELT PRE-TENSIONER", used along with a front seat belt, helps to reduce the risk or severity of injury to the driver and front passenger for certain types of collision. This system includes dual stage front air bag modules. The SRS system may only deploy one front air bag, depending on the severity of a collision and whether the front passenger seat is occupied. Information necessary to service the system safely is included in the SR and SB section of this Service Manual.

#### WARNING:

- To avoid rendering the SRS inoperative, which could increase the risk of personal injury or death in E the event of a collision which would result in air bag inflation, all maintenance must be performed by an authorized NISSAN/INFINITI dealer.
- Improper maintenance, including incorrect removal and installation of the SRS, can lead to personal injury caused by unintentional activation of the system. For removal of Spiral Cable and Air Bag Module, see the SR section.
- Do not use electrical test equipment on any circuit related to the SRS unless instructed to in this Service Manual. SRS wiring harnesses can be identified by yellow and/or orange harnesses or harness connectors.

#### PRECAUTIONS WHEN USING POWER TOOLS (AIR OR ELECTRIC) AND HAMMERS

#### WARNING:

- When working near the Airbag Diagnosis Sensor Unit or other Airbag System sensors with the Ignition ON or engine running, DO NOT use air or electric power tools or strike near the sensor(s) with a hammer. Heavy vibration could activate the sensor(s) and deploy the air bag(s), possibly causing serious injury.
- When using air or electric power tools or hammers, always switch the Ignition OFF, disconnect the battery, and wait at least 3 minutes before performing any service.

# **BODY CONTROL SYSTEM : System Description**

INFOID:000000009130579

[BCM]

OUTLINE

- BCM (body control module) controls various electrical components. It receives the information required from CAN communication and the signals received from each switch and sensor.
- BCM has a combination switch reading function for reading the status of combination switches (light, turn signal, wiper and washer) in addition to functions for controlling the operation of various electrical components. It also has a signal transmission function for other systems, and a power consumption control function that reduces the power consumption with the ignition switch OFF.
- BCM is equipped with a diagnosis function that operates with CONSULT and allows for various settings to be changed.

# COMBINATION SWITCH READING SYSTEM : System Description

INFOID:000000009130581

[BCM]

OUTLINE

- BCM reads the status of the combination switch (light, turn signal, wiper and washer) and recognizes the status of each switch.
- BCM has a combination of 5 output terminals (OUTPUT 1 5) and 5 input terminals (INPUT 1 5) and reads a maximum of 20 switch states.

#### COMBINATION SWITCH READING FUNCTION

#### Description

• BCM reads the status of the combination switch at 10 ms intervals normally.

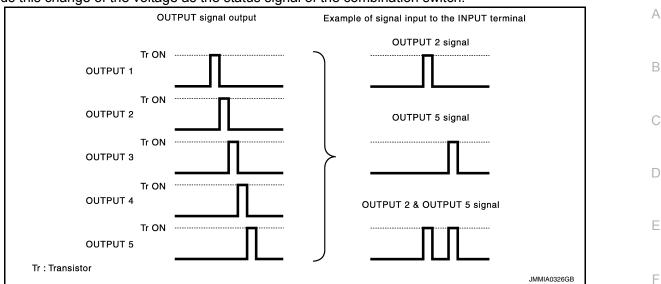

#### NOTE:

BCM reads the status of the combination switch at 60 ms intervals when BCM is controlled at low power consumption control mode.

- BCM operates as follows and judges the status of the combination switch.
- It operates the transistor on OUTPUT side in the following order: OUTPUT  $1 \rightarrow 2 \rightarrow 3 \rightarrow 4 \rightarrow 5$ , and outputs voltage waveform.
- The voltage waveform of OUTPUT corresponding to the formed circuit is input into the interface on INPUT side if any (1 or more) switches are ON.

#### < SYSTEM DESCRIPTION >

#### - It reads this change of the voltage as the status signal of the combination switch.

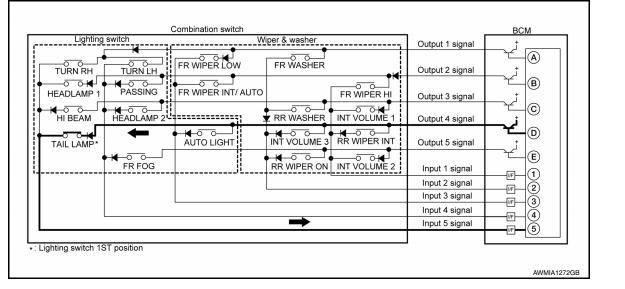

#### Operation Example

In the following operation example, the combination of the status signals of the combination switch is replaced as follows: INPUT 1 - 5 to "1 - 5" and OUTPUT 1 - 5 to "A - E".

Example 1: When a switch (TAIL LAMP) is turned ON

• The circuit between OUTPUT 4 and INPUT 5 is formed when the TAIL LAMP switch is turned ON.

BCM detects the combination switch status signal "5D" when the signal of OUTPUT 4 is input to INPUT 5.
BCM judges that the TAIL LAMP switch is ON when the signal "5D" is detected.

Example 2: When some switches (TURN RH, TAIL LAMP) are turned ON

BCS

Н

Κ

L

[BCM]

Ρ

#### < SYSTEM DESCRIPTION >

# • The circuits between OUTPUT 1 and INPUT 5 and between OUTPUT 4 and INPUT 5 are formed when the TURN RH switch and TAIL LAMP switch are turned ON.

|                   |              |                   |              |               |                 |         |
| : Lighting switch | 1ST position |                   |              |               |                 |         |

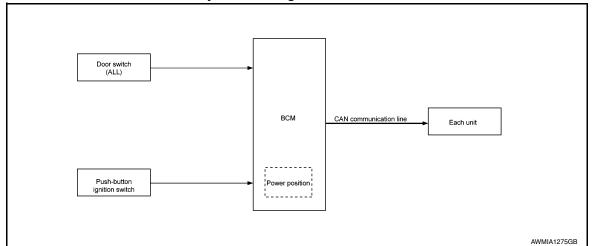

- BCM detects the combination switch status signal "5AD" when the signals of OUTPUT 1 and OUTPUT 4 are input to INPUT 5.
- BCM judges that the TURN RH switch and TAIL LAMP switch are ON when the signal "5AD" is detected.

WIPER INTERMITTENT DIAL POSITION SETTING (FRONT WIPER INTERMITTENT OPERATION) BCM judges the wiper intermittent dial 1 - 7 by the status of INT VOLUME 1, 2, and 3 switches.

| Wiper intermittent |              | Switch status |              |
|--------------------|--------------|---------------|--------------|
| dial position      | INT VOLUME 1 | INT VOLUME 2  | INT VOLUME 3 |
| 1                  | ON           | ON            | ON           |
| 2                  | ON           | ON            | OFF          |

#### OUTLINE

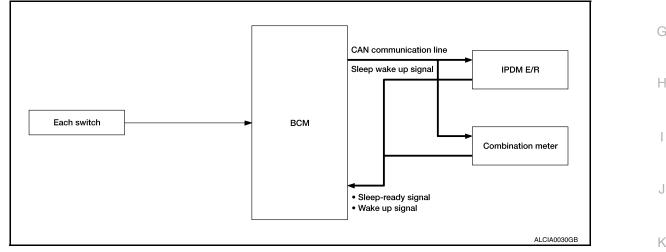

BCM has the signal transmission function that outputs/transmits each input/received signal to each unit.

Signal transmission function list

| Signal name  | Input                       | Output                                     | Description   |
|--|-----------------------------|--|---|
| <ul><li> Ignition switch ON signal</li><li> Ignition switch signal</li></ul> | Engine switch (push switch) | IPDM E/R (CAN)                             | Inputs the push-button ignition<br>switch (push switch) signal and<br>transmits the ignition switch sta-<br>tus judged with BCM via CAN<br>communication. |
| Door switch signal   | Any door switch             | Combination meter (CAN)     IPDM E/R (CAN) | Inputs the door switch signal<br>and transmits it via CAN com-<br>munication.   |

# POWER CONSUMPTION CONTROL SYSTEM

# POWER CONSUMPTION CONTROL SYSTEM : System Diagram

# POWER CONSUMPTION CONTROL SYSTEM : System Description

#### OUTLINE

- BCM incorporates a power saving control function that reduces the power consumption according to the vehicle status.
- BCM switches the status (control mode) by itself with the power saving control function. It performs the sleep request to each unit (IPDM E/R and combination meter) that operates with the ignition switch OFF.

#### Normal mode (wake-up)

- CAN communication is normally performed with other units
- Each control with BCM is operating properly

CAN communication sleep mode (CAN sleep)

- CAN transmission is stopped
- Control with BCM only is operating

Low power consumption mode (BCM sleep)

- Low power consumption control is active
- CAN transmission is stopped

#### LOW POWER CONSUMPTION CONTROL WITH BCM

BCM reduces the power consumption with the following operation in the low power consumption mode.

The reading interval of each switch changes from 10 ms interval to 60 ms interval.

Sleep mode activation

#### Revision: August 2013

## BCS-11

#### < SYSTEM DESCRIPTION >

- BCM receives the sleep-ready signal (ready) from IPDM E/R and combination meter via CAN communication.
- BCM transmits the sleep wake up signal (sleep) to each unit when all of the CAN sleep conditions are fulfilled.
- Each unit stops the transmission of CAN communication with the sleep wakeup signal. BCM is in CAN communication sleep mode.
- BCM is in the low power consumption mode and performs the low power consumption control when all of the BCM sleep conditions are fulfilled with CAN sleep condition.

#### Sleep condition

| CAN sleep condition  | BCM sleep condition   |
|--|---|
| <ul> <li>Receiving the sleep-ready signal (ready) from all units</li> <li>Ignition switch: OFF</li> <li>Vehicle security system alarm and panic alarm : No operation</li> <li>Warning lamp: Not operation</li> <li>Intelligent Key system buzzer: No operation</li> <li>Brake switch: OFF</li> <li>Turn signal indicator lamp: No operation</li> <li>Exterior lamp: OFF</li> <li>Door lock status: No change</li> <li>CONSULT communication status: No communication</li> <li>Meter display signal : Non-transmission</li> <li>Door switch status: No change</li> <li>Rear window defogger: OFF</li> </ul> | <ul> <li>Interior room lamp battery saver: Time out</li> <li>RAP system: OFF</li> <li>Power window switch communication: No transmission</li> <li>Push-button ignition switch (push switch) illumination: OFF</li> <li>NATS: No operation</li> <li>Remote keyless entry receiver communication status: No communication</li> <li>Tire pressure monitoring system: Stop</li> </ul> |

#### Wake-up operation

- BCM changes from the low power consumption mode to the CAN communication sleep mode when the any of the BCM wake-up conditions are fulfilled. Only the control with BCM is activated.
- BCM transmits the sleep wake up signal (wake up) to each unit when any of the CAN wake-up conditions are fulfilled. It changes from the low power consumption mode or the CAN communication sleep mode to the normal mode.
- Each unit starts the transmission of CAN communication with the sleep wake up signal. In addition, the combination meter transmits the wake up signal to BCM via CAN communication to report the CAN communication start.

| BCM wake-up condition  | CAN wake-up condition   |
|--|---|
| <ul> <li>Door unlock sensor: OFF→ON, ON→OFF</li> <li>Door lock assembly LH (key cylinder switch): Lock or unlock</li> <li>Door lock switch: OFF→ON</li> <li>Door unlock switch: OFF→ON</li> <li>Back door opener switch: OFF→ON</li> <li>Power window serial link communication: Receiving</li> <li>Remote keyless entry receiver: Receiving valid keyfob</li> </ul> | <ul> <li>Receiving the sleep-ready signal (Not-ready) from any units</li> <li>Push-button ignition switch (push switch): OFF→ON</li> <li>Hazard switch: OFF→ON</li> <li>PASSING switch: OFF→ON, ON→OFF</li> <li>TAIL LAMP switch: OFF→ON</li> <li>Driver door switch: OFF→ON, ON→OFF</li> <li>Passenger door switch: OFF→ON, ON→OFF</li> <li>Back door switch: OFF→ON, ON→OFF</li> <li>Driver door request switch: OFF→ON</li> <li>Passenger door request switch: OFF→ON</li> <li>Back door request switch: OFF→ON</li> <li>Back door request switch: OFF→ON</li> <li>Stop lamp switch 2 signal: ON</li> <li>Remote keyless entry receiver: Receiving valid keyfob</li> </ul> |

# < SYSTEM DESCRIPTION > DIAGNOSIS SYSTEM (BCM) COMMON ITEM

#### COMMON ITEM : CONSULT Function (BCM - COMMON ITEM)

#### INFOID:000000009130586

#### **CAUTION:**

After disconnecting the CONSULT vehicle interface (VI) from the data link connector, the ignition must be cycled OFF  $\rightarrow$  ON (for at least 5 seconds)  $\rightarrow$  OFF. If this step is not performed, the BCM may not go to "sleep mode", potentially causing a discharged battery and no-start condition.

#### APPLICATION ITEM

CONSULT performs the following functions via CAN communication with BCM.

| Direct Diagnostic Mode | Description   | E |
|------------------------|---|---|
| Ecu Identification     | The BCM part number is displayed.   |   |
| Self Diagnostic Result | The BCM self diagnostic results are displayed.  |   |
| Data Monitor           | The BCM input/output data is displayed in real time.  | F |
| Active Test            | The BCM activates outputs to test components.   |   |
| Work support           | The settings for BCM functions can be changed.  | 0 |
| Configuration          | <ul><li>The vehicle specification can be read and saved.</li><li>The vehicle specification can be written when replacing BCM.</li></ul> | G |
| CAN Diag Support Mntr  | The result of transmit/receive diagnosis of CAN communication is displayed.   | Н |

#### SYSTEM APPLICATION

BCM can perform the following functions.

|                                      |                 |                    |                        | Direct [     | Diagnosti   | c Mode       |               |                       |     |

# DOOR LOCK

# DOOR LOCK : CONSULT Function (BCM - DOOR LOCK)

INFOID:000000009130587

#### **CAUTION:**

After disconnecting the CONSULT vehicle interface (VI) from the data link connector, the ignition must be cycled OFF  $\rightarrow$  ON (for at least 5 seconds)  $\rightarrow$  OFF. If this step is not performed, the BCM may not go to "sleep mode", potentially causing a discharged battery and no-start condition.

#### SELF DIAGNOSTIC RESULT Refer to <u>BCS-51, "DTC Index"</u>.

DATA MONITOR

| Monitor Item [Unit]    | Description  |
|------------------------|--|
| REQ SW-DR [On/Off]     | Indicates condition of door request switch LH.                         |
| REQ SW-AS [On/Off]     | Indicates condition of door request switch RH.                         |
| REQ SW-BD/TR [On/Off]  | Indicates condition of back door request switch.                       |
| DOOR SW-DR [On/Off]    | Indicates condition of front door switch LH.                           |
| DOOR SW-AS [On/Off]    | Indicates condition of front door switch RH.                           |
| DOOR SW-RR [On/Off]    | Indicates condition of rear door switch RH.                            |
| DOOR SW-RL [On/Off]    | Indicates condition of rear door switch LH.                            |
| DOOR SW-BK [On/Off]    | Indicates condition of back door switch.                               |
| CDL LOCK SW [On/Off]   | Indicates condition of lock signal from door lock and unlock switch.   |
| CDL UNLOCK SW [On/Off] | Indicates condition of unlock signal from door lock and unlock switch. |
| KEY CYL LK-SW [On/Off] | Indicates condition of lock signal from door key cylinder switch.      |
| KEY CYL UN-SW [On/Off] | Indicates condition of unlock signal from door key cylinder switch.    |

#### ACTIVE TEST

| Test Item | Description   |
|-----------|---|
| DOOR LOCK | This test is able to check door lock operation [ALL LOCK/ALL UNLK]. |

#### WORK SUPPORT

| Support Item         | Setting | Description                             |
|----------------------|---------|---|
| DOOR LOCK-UNLOCK SET | On*     | Automatic door locks function ON.       |
|                      | Off     | Automatic door locks function OFF.      |
| AUTO UNLOCK TYPE     | MODE2   | Driver door only unlocks automatically. |
|                      | MODE1*  | All doors unlock automatically.         |

#### < SYSTEM DESCRIPTION >

| Support Item         | Setting | Description   |
|----------------------|---------|---|
| AUTO LOCK FUNCTION   | MODE3   | This mode is not used.  |
|                      | MODE2   | Doors lock automatically when shifted out of P (park).                |
|                      | MODE1*  | Doors lock automatically when vehicle speed reaches 24 km/h (15 mph). |
|                      | Off     |   |
|                      | MODE3   | This mode is not used.  |
|                      | MODE2   | Doors unlock automatically when shifted into P (park).                |
| AUTO UNLOCK FUNCTION | MODE1*  | Doors unlock automatically when ignition is switched from ON to OFF.  |
|                      | Off     | _   |

\* : Initial setting

#### REAR DEFOGGER

# REAR DEFOGGER : CONSULT Function (BCM - REAR DEFOGGER)

#### **CAUTION:**

After disconnecting the CONSULT vehicle interface (VI) from the data link connector, the ignition must be cycled OFF  $\rightarrow$  ON (for at least 5 seconds)  $\rightarrow$  OFF. If this step is not performed, the BCM may not go to "sleep mode", potentially causing a discharged battery and no-start condition.

#### DATA MONITOR

| Monitor Item [Unit]  | Description   | Н |
|----------------------|---|---|
| PUSH SW [On/Off]     | Indicates condition of push-button ignition switch. |   |
| REAR DEF SW [On/Off] | Indicates condition of rear window defogger switch. | I |

#### ACTIVE TEST

| Test Item     | Description   | J |
|---------------|---|---|
| REAR DEFOGGER | This test is able to check rear window defogger operation [Off/On]. |   |

#### WORK SUPPORT

| Support Item    | Setting | Description                                |   |
|-----------------|---------|--|---|
| SET R-DEF TIMER | MODE3   | Rear defogger turns OFF after 1 minute.    | L |
|                 | MODE2   | Rear defogger remains ON until turned OFF. |   |
|                 | MODE1*  | Rear defogger turns OFF after 15 minutes.  |   |

\* : Initial setting BUZZER

BUZZER : CONSULT Function (BCM - BUZZER)

#### **CAUTION:**

After disconnecting the CONSULT vehicle interface (VI) from the data link connector, the ignition must be cycled OFF  $\rightarrow$  ON (for at least 5 seconds)  $\rightarrow$  OFF. If this step is not performed, the BCM may not go to "sleep mode", potentially causing a discharged battery and no-start condition.

#### DATA MONITOR

| Monitor Item [Unit]   | Description   |
|-----------------------|---|
| PUSH SW [On/Off]      | Indicates condition of push-button ignition switch.                         |
| UNLK SEN -DR [On/Off] | Indicates condition of door unlock sensor.                                  |
| VEH SPEED 1 [km/h]    | Indicates vehicle speed signal received from ABS on CAN communication line. |

| [BCM] |
|-------|
|-------|

| Monitor Item [Unit]                              | Main | Description   |
|--|------|---|
| PRBT ENG STRT [Set/Reset]                        |      | Indicates condition of engine start prohibit.   |
| ID AUTHENTICATION CANCEL TIMER<br>[under a stop] |      | Indicates condition of Intelligent Key ID authentication.   |
| ACC BATTERY SAVER [under a stop]                 |      | Indicates condition of battery saver.   |
| CRNK PRBT TMR [On/Off]                           |      | Indicates condition of crank prohibit timer.  |
| AUT CRNK TMR [On/Off]                            |      | Indicates condition of automatic engine crank timer from Intelligent Key.   |
| CRNK PRBT TME [sec]                              |      | Indicates condition of engine crank prohibit time.  |
| CRANKING TME [sec]                               |      | Indicates condition of engine cranking time from Intelligent Key.   |
| DETE SW PWR [On/Off]                             |      | Indicates condition of detent switch voltage.   |
| ACC RLY -REQ [On/Off]                            |      | Indicates condition of accessory relay control request.   |
| RKE OPE COUN1 [0-19]                             | ×    | When remote keyless entry receiver receives the signal transmitted while oper-<br>ating on Intelligent Key, the numerical value start changing. |
| RKE OPE COUN2 [0-19]                             | ×    | When remote keyless entry receiver receives the signal transmitted while oper-<br>ating on Intelligent Key, the numerical value start changing. |
| TRNK/HAT MNTR [On/Off]                           |      | Indicates condition of trunk room lamp switch.  |
| RKE-LOCK [On/Off]                                |      | Indicates condition of lock signal from Intelligent Key.  |
| RKE-UNLOCK [On/Off]                              |      | Indicates condition of unlock signal from Intelligent Key.  |
| RKE-TR/BD [On/Off]                               |      | Indicates condition of back door open signal from Intelligent Key.  |
| RKE-PANIC [On/Off]                               |      | Indicates condition of panic signal from Intelligent Key.   |
| RKE-MODE CHG [On/Off]                            |      | Indicates condition of mode change signal from Intelligent Key.   |

#### ACTIVE TEST

| Test Item                  | Description  |
|----------------------------|--|
| INTELLIGENT KEY LINK (CAN) | This test is able to check Intelligent Key identification number [Off/ID No1/ID N02/ID No3/ID No4/ID No5]. |
| INT LAMP                   | This test is able to check interior room lamp operation [On/Off].  |
| FLASHER                    | This test is able to check hazard lamp operation [LH/RH/Off].  |
| HORN                       | This test is able to check horn operation [On].  |
| BATTERY SAVER              | This test is able to check battery saver operation [On/Off].   |
| TRUNK/BACK DOOR            | This test is able to check back door actuator operation [Open].  |
| OUTSIDE BUZZER             | This test is able to check Intelligent Key warning buzzer operation [On/Off].                              |
| INSIDE BUZZER              | This test is able to check combination meter warning chime operation [Take Out/Knob/Key/<br>Off].          |
| INDICATOR                  | This test is able to check combination meter warning lamp operation [KEY ON/KEY IND/Off].                  |
| IGN CONT2                  | This test is able to check ignition relay-2 control operation [On/Off].                                    |
| ENGINE SW ILLUMI           | This test is able to check push-button ignition switch START indicator operation [On/Off].                 |
| PUSH SWITCH INDICATOR      | This test is able to check push-button ignition switch indicator operation [On/Off].                       |
| ACC CONT                   | This test is able to check accessory relay control operation [On/Off].                                     |
| IGN CONT1                  | This test is able to check ignition relay-1 control operation [On/Off].                                    |
| ST CONT LOW                | This test is able to check starter control relay operation [On/Off].                                       |
| IGNITION RELAY             | This test is able to check ignition relay operation [On/Off].  |
| REVERSE LAMP TEST          | This test is able to check reverse lamp illumination operation [On/Off].                                   |
| DOOR HANDLE LAMP TEST      | This test is able to check door handle lamp illumination operation [On/Off].                               |
| TRUNK/LUGGAGE LAMP TEST    | This test is able to check cargo lamp illumination operation [On/Off].                                     |

#### < SYSTEM DESCRIPTION >

| Test Item               | Description  |
|-------------------------|--|
| KEYFOB PW TEST          | This test is able to check power window operation using the Intelligent Key [P/W up/down OFF/Send P/W down ON/Send P/W up ON]. |
| SHIFTLOCK SOLENOID TEST | This test is able to check shift lock solenoid operation [On/Off].   |

#### WORK SUPPORT

| Support Item                 | Se      | tting    | Description   |
|------------------------------|---------|----------|---|
|                              | On*     |          | Battery saver function ON.  |
| IGN/ACC Battery Saver        | Off     |          | Battery saver function OFF.   |
|                              | On*     |          | Remote engine start function ON.  |
| REMOTE ENGINE STARTER        | Off     |          | Remote engine start function OFF.   |
|                              | BUZZER  |          | Buzzer reminder function by door lock/unlock request switch ON.                       |
|                              | HORN    |          | Horn chirp reminder function by door lock request switch ON.                          |
| ANSWERBACK I-KEY LOCK UNLOCK | Off*    |          | No reminder function by door lock/unlock request switch.                              |
|                              | INVALID |          | This mode is not used.  |
| ANSWERBACK KEYLESS LOCK UN-  | On      |          | Buzzer or horn chirp reminder when doors are locked/unlocked with Intelligent Key.    |
| LOCK                         | Off*    |          | No buzzer or horn chirp reminder when doors are locked/unlocked with Intelligent Key. |
| WELCOME LIGHT OP SET         | On*     |          | Door handle lamp function from request switch ON.                                     |
| WELCOME LIGHT OF SET         | Off     |          | Door handle lamp function from request switch OFF.                                    |

# COMB SW

#### COMB SW : CONSULT Function (BCM - COMB SW)

INFOID:000000009130596

[BCM]

А

#### **CAUTION:**

After disconnecting the CONSULT vehicle interface (VI) from the data link connector, the ignition must be cycled OFF  $\rightarrow$  ON (for at least 5 seconds)  $\rightarrow$  OFF. If this step is not performed, the BCM may not go to "sleep mode", potentially causing a discharged battery and no-start condition.

#### DATA MONITOR

| Monitor Item [Unit]     | Description   |   |
|-------------------------|---|---|
| FR WIPER HI [On/Off]    |   | - |
| FR WIPER LOW [On/Off]   | Indicates condition of winer exerction of combination switch                  |   |
| FR WASHER SW [On/Off]   | Indicates condition of wiper operation of combination switch.                 |   |
| FR WIPER INT [On/Off]   |   |   |
| INT VOLUME [1 - 7]      | Indicates condition of intermittent wiper operation of combination switch.    |   |
| RR WIPER ON [On/Off]    |   |   |
| RR WIPER INT [On/Off]   | Indicates condition of rear wiper operation of combination switch.            |   |
| RR WASHER SW [On/Off]   |   |   |
| TURN SIGNAL R [On/Off]  | Indicates condition of right turn signal operation of combination switch.     |   |
| TURN SIGNAL L [On/Off]  | Indicates condition of left turn signal operation of combination switch.      |   |
| TAIL LAMP SW [On/Off]   | Indicates condition of tail lamp switch operation of combination switch.      |   |
| HI BEAM SW [On/Off]     | Indicates condition of Hi beam switch operation of combination switch.        |   |
| HEAD LAMP SW 1 [On/Off] | Indicates condition of head lamp switch 1 operation of combination switch.    |   |
| HEAD LAMP SW 2 [On/Off] | Indicates condition of head lamp switch 2 operation of combination switch.    |   |
| PASSING SW [On/Off]     | Indicates condition of passing switch operation of combination switch.        |   |
| AUTO LIGHT SW [On/Off]  | Indicates condition of auto light switch operation of combination switch.     |   |
| FR FOG SW [On/Off]      | Indicates condition of front fog lamp switch operation of combination switch. |   |

#### BCM

#### BCM : CONSULT Function (BCM - BCM)

#### **CAUTION:**

After disconnecting the CONSULT vehicle interface (VI) from the data link connector, the ignition must be cycled OFF  $\rightarrow$  ON (for at least 5 seconds)  $\rightarrow$  OFF. If this step is not performed, the BCM may not go to "sleep mode", potentially causing a discharged battery and no-start condition.

#### ECU IDENTIFICATION

The BCM part number is displayed.

SELF DIAGNOSTIC RESULT Refer to <u>BCS-51, "DTC Index"</u>.

#### WORK SUPPORT

| Support Item        | Setting | Description                                       |  |
|---------------------|---------|---|--|
| RESET SETTING VALUE | Reset   | Returns BCM to initial value in factory shipment. |  |
|                     | Cancel  | Cancels the reset function.                       |  |

#### CONFIGURATION

Refer to BCS-64, "CONFIGURATION (BCM) : Description".

#### DATA MONITOR

| Monitor Item [Unit]      | Description  |
|--------------------------|--|
| CONFRM ID ALL [Yet/DONE] |  |
| CONFIRM ID4 [Yet/DONE]   |  |
| CONFIRM ID3 [Yet/DONE]   | Switches to DONE when an Intelligent Key is registered.                      |
| CONFIRM ID2 [Yet/DONE]   |  |
| CONFIRM ID1 [Yet/DONE]   |  |
| TP 4 [Yet/DONE]          |  |
| TP 3 [Yet/DONE]          | DONE indicates the number of Intelligent Key ID which has been registered    |
| TP 2 [Yet/DONE]          | — DONE indicates the number of Intelligent Key ID which has been registered. |
| TP 1 [Yet/DONE]          |  |
| PUSH SW [On/Off]         | Indicates condition of push-button ignition switch.                          |

#### ACTIVE LEST

| Test Item | Description   |
|-----------|---|
| THEFT IND | This test is able to check security indicator operation [On/Off]. |
|           |   |

#### BATTERY SAVER

#### BATTERY SAVER : CONSULT Function (BCM - BATTERY SAVER)

INFOID:000000009130599

#### **CAUTION:**

After disconnecting the CONSULT vehicle interface (VI) from the data link connector, the ignition must be cycled OFF  $\rightarrow$  ON (for at least 5 seconds)  $\rightarrow$  OFF. If this step is not performed, the BCM may not go to "sleep mode", potentially causing a discharged battery and no-start condition.

#### DATA MONITOR

| Monitor Item [Unit]   | Description                                      |
|-----------------------|--|
| REQ SW -DR [On/Off]   | Indicates condition of door request switch LH.   |
| REQ SW -AS [On/Off]   | Indicates condition of door request switch RH.   |
| PUSH SW [On/Off]      | Indicates condition push-button ignition switch. |
| UNLK SEN -DR [On/Off] | Indicates condition of door unlock sensor.       |
| DOOR SW-DR [On/Off]   | Indicates condition of front door switch LH.     |
| DOOR SW-AS [On/Off]   | Indicates condition of front door switch RH.     |
| DOOR SW-RR [On/Off]   | Indicates condition of rear door switch RH.      |
| DOOR SW-RL [On/Off]   | Indicates condition of rear door switch LH.      |
| DOOR SW-BK [On/Off]   | Indicates condition of back door switch.         |

| Monitored Item         | Description  |
|------------------------|--|
| DOOR SW-RR [On/Off]    | Indicates condition of rear door switch RH.                            |
| DOOR SW-RL [On/Off]    | Indicates condition of rear door switch LH.                            |
| DOOR SW-BK [On/Off]    | Indicates condition of back door switch.                               |
| CDL LOCK SW [On/Off]   | Indicates condition of lock signal from door lock and unlock switch.   |
| CDL UNLOCK SW [On/Off] | Indicates condition of unlock signal from door lock and unlock switch. |
| KEY CYL LK-SW [On/Off] | Indicates condition of lock signal from door key cylinder switch.      |
| KEY CYL UN-SW [On/Off] | Indicates condition of unlock signal from door key cylinder switch.    |
| TRNK/HAT MNTR [On/Off] | Indicates condition of trunk room lamp switch.                         |
| TR/BD OPEN SW [On/Off] | Indicates condition of back door opener switch.                        |
| RKE-LOCK [On/Off]      | Indicates condition of lock signal from Intelligent Key.               |
| RKE-UNLOCK [On/Off]    | Indicates condition of unlock signal from Intelligent Key.             |
| RKE-TR/BD [On/Off]     | Indicates condition of back door open signal from Intelligent Key.     |

#### ACTIVE TEST

| Test Item             | Description  |
|-----------------------|--|
| FLASHER               | This test is able to check turn signal lamp operation [LH/RH/Off].     |
| THEFT IND             | This test is able to check security indicator lamp operation [On/Off]. |
| VEHICLE SECURITY HORN | This test is able to check vehicle security horn operation [On].       |
| HEADLAMP(HI)          | This test is able to check vehicle security lamp operation [On].       |

#### WORK SUPPORT

| Support Item       | Setting | Description         |
|--------------------|---------|---------------------|
| SECURITY ALARM SET | On      | Security alarm ON.  |
|                    | Off     | Security alarm OFF. |

#### **RETAINED PWR**

#### RETAINED PWR : CONSULT Function (BCM - RETAINED PWR)

INFOID:000000009130602

#### **CAUTION:**

After disconnecting the CONSULT vehicle interface (VI) from the data link connector, the ignition must be cycled OFF  $\rightarrow$  ON (for at least 5 seconds)  $\rightarrow$  OFF. If this step is not performed, the BCM may not go to "sleep mode", potentially causing a discharged battery and no-start condition.

#### DATA MONITOR

| Monitor Item [Unit] | Description                                  |
|---------------------|--|
| DOOR SW-DR [On/Off] | Indicates condition of front door switch LH. |
| DOOR SW-AS [On/Off] | Indicates condition of front door switch RH. |

#### SIGNAL BUFFER

#### SIGNAL BUFFER : CONSULT Function (BCM - SIGNAL BUFFER)

INFOID:000000009130603

#### **CAUTION:**

After disconnecting the CONSULT vehicle interface (VI) from the data link connector, the ignition must be cycled OFF  $\rightarrow$  ON (for at least 5 seconds)  $\rightarrow$  OFF. If this step is not performed, the BCM may not go to "sleep mode", potentially causing a discharged battery and no-start condition.

#### NOTE:

The Signal Tech II Tool (J-50190) can be used to perform the following functions. Refer to the Signal Tech II User Guide for additional information.

- Activate and display TPMS transmitter IDs
- Display tire pressure reported by the TPMS transmitter
- Read TPMS DTCs
- Register TPMS transmitter IDs
- Check Intelligent Key relative signal strength
- · Confirm vehicle Intelligent Key antenna signal strength

#### VALUES ON THE DIAGNOSIS TOOL

| Monitor Item      | Condition  | Value/Status                  |  |  |
|-------------------|--|-------------------------------|--|--|
| ACC BATTERY SAVER | When battery saver is OFF.                                     | Under a stop                  |  |  |
| ACC RLY -REQ      | When BCM is not requesting accessory relay activation.         | Off                           |  |  |
| AUU KLI -KEQ      | When BCM is requesting accessory relay activation.             | On                            |  |  |
| AIR COND SW       | A/C switch OFF   | Off                           |  |  |
| AIR COND SW       | A/C switch ON  | On                            |  |  |
| AIR PRESS FL      | Front left tire air pressure value                             | kPa, kg/cm <sup>2</sup> , psi |  |  |
| AIR PRESS FR      | Front right tire air pressure value                            | kPa, kg/cm <sup>2</sup> , psi |  |  |
| AIR PRESS RL      | Rear left tire air pressure value                              | kPa, kg/cm <sup>2</sup> , psi |  |  |
| AIR PRESS RR      | Rear right tire air pressure value                             | kPa, kg/cm <sup>2</sup> , psi |  |  |
|                   | When the remote engine start timer is OFF.                     | Off                           |  |  |
| AUTO CRNK TMR     | When the remote engine start timer is ON.                      | On                            |  |  |
| AUTO LIGHT SW     | Lighting switch OFF  | Off                           |  |  |
| AUTO LIGHT SW     | Lighting switch AUTO   | On                            |  |  |
|                   | Back door LOCK status  | LOCK                          |  |  |
| BK DOOR STATE     | Back door UNLOCK status  | UNLK                          |  |  |
|                   | Wait with selective UNLOCK operation (5 seconds)               | READY                         |  |  |
|                   | When the brake pedal is released                               | On                            |  |  |
| BRAKE SW 1        | When the brake pedal is depressed                              | Off                           |  |  |
| BRAKE SW2         | Brake pedal released   | Off                           |  |  |
| DIARE SWZ         | Brake pedal depressed  | On                            |  |  |
| BUZZER            | Buzzer in combination meter OFF                                | Off                           |  |  |
| DOZZEIN           | Buzzer in combination meter ON                                 | On                            |  |  |
| CDL LOCK SW       | Door lock/unlock switch does not operate                       | Off                           |  |  |
|                   | Press door lock/unlock switch to the LOCK side                 | On                            |  |  |
| CDL UNLOCK SW     | Door lock/unlock switch does not operate                       | Off                           |  |  |
|                   | Press door lock/unlock switch to the UNLOCK side               | On                            |  |  |
| CONFRM ID ALL     | The key ID does not match any key ID registered to BCM.        | Yet                           |  |  |
|                   | The key ID matches any key ID registered to BCM.               | DONE                          |  |  |
| CONFIRM ID4       | The key ID does not match the fourth key ID registered to BCM. | Yet                           |  |  |
|                   | The key ID matches the fourth key ID registered to BCM.        | DONE                          |  |  |

### DTC Index

#### NOTE:

Details of time display

- CRNT: Displays when there is a malfunction now or after returning to the normal condition until turning ignition switch OFF → ON again.
- 1 39: Displayed if any previous malfunction is present when current condition is normal. It increases like 1  $\rightarrow$  2  $\rightarrow$  3...38  $\rightarrow$  39 after returning to the normal condition whenever ignition switch OFF  $\rightarrow$  ON. The counter remains at 39 even if the number of cycles exceeds it. It is counted from 1 again when turning ignition switch OFF  $\rightarrow$  ON after returning to the normal condition if the malfunction is detected again.

### **INSPECTION AND ADJUSTMENT**

< BASIC INSPECTION >

### CONFIGURATION (BCM) : Description

Vehicle specification needs to be written with CONSULT because it is not written after replacing BCM. Configuration has three functions as follows:

| Function                 | Description   |
|--------------------------|---|
| "Before Replace ECU"     | <ul><li>Reads the vehicle configuration of current BCM.</li><li>Saves the read vehicle configuration.</li></ul> |
| "After Replace ECU"      | Writes the vehicle configuration with manual selection.   |
| "Select Saved Data List" | Writes the vehicle configuration with saved data.   |

#### **CAUTION:**

• When replacing BCM, you must perform "Select Saved Data List" or "After Replace ECU" with CON-SULT.

- Complete the procedure of "Select Saved Data List" or "After Replace ECU" in order.
- If you set incorrect "Select Saved Data List" or "After Replace ECU", incidents might occur.
- Configuration is different for each vehicle model. Confirm configuration of each vehicle model.

• Never perform "Select Saved Data List" or "After Replace ECU" except for new BCM.

#### CONFIGURATION (BCM) : Work Procedure

INFOID:000000009130613

**1**.WRITING MODE SELECTION

CONSULT Select "Reprogramming, Configuration" of BCM.

When writing saved data>>GO TO 2. When writing manually>>GO TO 3.

2.Perform "Saved data list"

#### CONSULT

Automatically "Operation Log Selection" window will display if "Before Replace ECU" was performed. Select applicable file from the "Save Data List" and press "Confirm".

>> Work End.

 $\mathbf{3}$ .PERFORM "AFTER REPLACE ECU" OR "MANUAL CONFIGURATION"

#### CONSULT

- 1. Select "After Replace ECU" or "Manual Configuration".
- Identify the correct model and configuration list. Refer to <u>BCS-65, "CONFIGURATION (BCM) : Configura-</u> tion List".
- 3. Confirm and/or change setting value for each item.
- CAUTION:

Thoroughly read and understand the vehicle specification. ECU control may not operate normally if the setting is not correct.

- 4. Select "Next".
  - CAUTION:

Make sure to select "Next", confirm each setting value and press "OK" even if the indicated configuration of brand new BCM is same as the desirable configuration. If not, configuration which is set automatically by selecting vehicle model cannot be memorized.

5. When "Completed", select "End".

>> GO TO 4.

#### **4.**OPERATION CHECK

Confirm that each function controlled by BCM operates normally.

>> Work End.

### **INSPECTION AND ADJUSTMENT**

< BASIC INSPECTION >

### CONFIGURATION (BCM) : Configuration List

#### **CAUTION:**

Thoroughly read and understand the vehicle specification. Incorrect settings may result in abnormal control of ECU.

### TRANSIT MODE CANCEL OPERATION

#### < BASIC INSPECTION >

### TRANSIT MODE CANCEL OPERATION

### Description

- BCM is in transit mode if turn signal indicator on combination meter turns ON for 1 minute when ignition switch is turned from OFF to ON.
- In this case, cancel operation must be performed.

#### NOTE:

Do not cancel transit mode during storage of the vehicle. Always cancel transit mode before delivery of the vehicle to customer.

### Work Procedure

INFOID:000000009130616

INFOID:000000009130615

### 1.TRANSIT MODE CANCEL OPERATION

- 1. Turn ignition switch OFF.
- 2. Turn and hold front wiper switch to HI, and then operate turn signal switch to RH or LH.

#### >> GO TO 2.

## 2.TRANSIT MODE CANCEL CHECK

- 1. Turn front wiper switch and turn signal switch OFF.
- 2. Turn ignition switch ON.
- 3. Check that turn signal indicator on combination meter does not turn ON.

>> WORK END

### Description

Refer to LAN-17, "CAN COMMUNICATION SYSTEM : System Description".

### DTC Logic

### DTC DETECTION LOGIC

< DTC/CIRCUIT DIAGNOSIS >

**DTC/CIRCUIT DIAGNOSIS** 

U1000 CAN COMM CIRCUIT

#### NOTE:

U1000 can be set if a module harness was disconnected and reconnected, perhaps during a repair. Confirm that there are actual CAN diagnostic symptoms and a present DTC by performing the Self Diagnostic Result procedure.

| CONSULT Display             | DTC Detection Condition  | Possible cause   |   |
|-----------------------------|--|--|---|
| CAN COMM CIRCUIT<br>[U1000] | When any listed module cannot communicate with CAN communication signal continuously for 2 seconds or more with ignition switch ON | In CAN communication system, any item (or items)<br>of the following listed below is malfunctioning.<br>• Transmission<br>• Receiving (ECM)<br>• Receiving (VDC/TCS/ABS)<br>• Receiving (METER/M&A)<br>• Receiving (TCM)<br>• Receiving (IPDM E/R) | ( |

### **Diagnosis** Procedure

1. PERFORM SELF DIAGNOSTIC

1. Turn ignition switch ON and wait for 2 second or more.

2. Check "SELF- DIAG RESULTS".

Is "CAN COMM CIRCUIT" displayed?

YES >> Perform CAN Diagnosis as described in DIAGNOSIS section of CONSULT Operation Manual.

NO >> Refer to <u>GI-53, "Intermittent Incident"</u>.

### COMBINATION SWITCH INPUT CIRCUIT

### Diagnosis Procedure

[BCM]

Regarding Wiring Diagram information, refer to BCS-54, "Wiring Diagram".

### 1. CHECK INPUT 1 - 5 SYSTEM CIRCUIT FOR OPEN

- 1. Turn ignition switch OFF.
- 2. Disconnect BCM connector M19 and combination switch connector.
- 3. Check continuity between BCM connector M19 and combination switch connector.

| Signal  | BC        | CM       | Combinat  | Continuity |              |  |  |
|---------|-----------|----------|-----------|------------|--------------|--|--|
| Signal  | Connector | Terminal | Connector | Terminal   | - Continuity |  |  |
| INPUT 1 |           | 79       |           | 11         |              |  |  |
| INPUT 2 |           | 78       |           | 9          |              |  |  |
| INPUT 3 | M19       | 77       | M28       | 7          | Yes          |  |  |
| INPUT 4 |           | 76       |           | 10         |              |  |  |
| INPUT 5 |           | 75       |           | 13         | -            |  |  |

#### Is the inspection result normal?

YES >> GO TO 2.

NO >> Repair or replace harness or connectors.

2. CHECK INPUT 1 - 5 SYSTEM CIRCUIT FOR SHORT

Check continuity between BCM connector M19 and ground.

| Signal  | BCM       |          |        | Continuity |
|---------|-----------|----------|--------|------------|
| Signal  | Connector | Terminal | _      | Continuity |
| INPUT 1 |           | 79       | _      |            |
| INPUT 2 |           | 78       | Ground |            |
| INPUT 3 | M19       | 77       | _      | No         |

### COMBINATION SWITCH OUTPUT CIRCUIT

Diagnosis Procedure

[BCM]

Regarding Wiring Diagram information, refer to BCS-54, "Wiring Diagram".

### 1. CHECK OUTPUT 1 - 5 SYSTEM CIRCUIT FOR OPEN

- 1. Turn ignition switch OFF.
- 2. Disconnect BCM connector M18 and combination switch connector.
- 3. Check continuity between BCM connector M18 and combination switch connector.

| Signal   | BCI       | M                  | Combinati | Continuity |            |
|----------|-----------|--------------------|-----------|------------|------------|
| Signal   | Connector | Connector Terminal |           | Terminal   | Continuity |
| OUTPUT 1 |           | 14                 |           | 12         |            |
| OUTPUT 2 |           | 13                 |           | 14         |            |
| OUTPUT 3 | M18       | 12                 | M28       | 5          | Yes        |
| OUTPUT 4 |           | 11                 |           | 2          |            |
| OUTPUT 5 |           | 10                 |           | 8          |            |

#### Is the inspection result normal?

YES >> GO TO 2.

NO >> Repair or replace harness or connectors.

## 2. CHECK OUTPUT 1 - 5 SYSTEM CIRCUIT FOR SHORT

Check continuity between BCM connector M18 and ground.

| Signal   | BCM       |          |        | Continuity |
|----------|-----------|----------|--------|------------|
| Signal   | Connector | Terminal |        | Continuity |
| OUTPUT 1 |           | 14       |        |            |
| OUTPUT 2 |           | 13       | Ground |            |
| OUTPUT 3 | M18       | 12       |        | No         |
| OUTPUT 4 |           | 11       |        |            |
| OUTPUT 5 |           | 10       |        |            |

Is the inspection result normal?

YES >> GO TO 3.

NO >> Repair or replace harness or connectors.

 $\mathbf{3}$ . CHECK BCM INPUT VOLTAGE

1. Connect BCM connector M18 and combination switch connector.

2. Turn ignition switch ON.

3. Check voltage between BCM connector M18 and ground.

| Signal   | BC        | CM       | Ground | Voltago   |  |
|----------|-----------|----------|--------|---|--|
| Signal   | Connector | Terminal | Ground | Voltage   |  |

3. Identify the malfunctioning part from the agreed combination and repair or replace the part.

| Malfunction combination | Malfunctioning part                 | Repair or replace  |
|-------------------------|-------------------------------------|--|
| А                       | Combination switch INPUT 1 circuit  |  |
| В                       | Combination switch INPUT 2 circuit  |  |
| С                       | Combination switch INPUT 3 circuit  | Inspect the combination switch input circuit applicable to the malfunctioning part. Refer to <u>BCS-74</u> , " <u>Diagnosis Procedure</u> ". |
| D                       | Combination switch INPUT 4 circuit  |  |
| E                       | Combination switch INPUT 5 circuit  |  |
| F                       | Combination switch OUTPUT 1 circuit |  |
| G                       | Combination switch OUTPUT 2 circuit |  |
| Н                       | Combination switch OUTPUT 3 circuit | Inspect the combination switch output circuit applicable to the malfunction-<br>ing part. Refer to BCS-76, "Diagnosis Procedure".            |
| I                       | Combination switch OUTPUT 4 circuit |  |
| J                       | Combination switch OUTPUT 5 circuit |  |
| К                       | ВСМ                                 | Replace BCM. Refer to BCS-79, "Removal and Installation".  |
| L                       | Combination switch                  | Replace the combination switch. Refer to <u>BCS-80. "Removal and Installa-</u><br>tion".   |

Malfunction item: ×

INFOID:000000009130632

### BCM **Removal and Installation CAUTION:** Before replacing the BCM, perform "READ CONFIGURATION" to save or print current vehicle specification. Refer to BCS-63, "ADDITIONAL SERVICE WHEN REPLACING CONTROL UNIT (BCM) : Description". REMOVAL 1. Disconnect the negative battery terminal. Refer to PG-93, "Removal and Installation". Remove the combination meter. Refer to <u>MWI-95</u>, "Removal and Installation". Remove the BCM bolts. Disconnect the harness connectors from the BCM (1) and remove.

### **INSTALLATION**

4.

Installation is in the reverse order of removal. CAUTION:

< REMOVAL AND INSTALLATION >

**REMOVAL AND INSTALLATION** 

- Be sure to perform "WRITE CONFIGURATION" when replacing BCM.
- Be sure to perform the system initialization (NATS) when replacing BCM. Refer to BCS-63, "ADDI-TIONAL SERVICE WHEN REPLACING CONTROL UNIT (BCM) : Work Procedure".

### Removal and Installation

INFOID:000000009130635

#### REMOVAL

- 1. Remove the steering wheel. Refer to ST-46. "Removal and Installation".
- 2. Remove the steering column covers. Refer to IP-17, "Removal and Installation".
- 3. Remove the combination switch screws.
- 4. Disconnect the harness connector from the combination switch and remove.

#### INSTALLATION

Installation is in the reverse order of removal.
